

**An Investigation of the Buckling Strength of Coped
Steel I-Beams**

by

Lam Chi Chiu, Angus

TABLE OF CONTENTS

Chapter		Page
1	Introduction	1
	1.1 General.....	1
	1.2 Literature and Present Design Formula Review.....	1
	1.3 Statement of Problems.....	8
	1.4 Objectives.....	10
Part I	Analytical Study of the Elastic Lateral Torsional Buckling of Coped I-Beams.....	16
2	Analytical Study.....	17
	2.1 General	17
	2.2 Finite Element Model.....	17
	2.3 Comparison of Finite Element Results with Present Design Formula.....	18
	2.4 Buckling Strength of Tee-Section.....	20
	2.5 Study of Symmetrical Double Load Case.....	22
3	Modification of Present Design Formula for Top Flange Coped I-Beam	35
	3.1 Modification of Present Design Formula with no Bracing at Load Position.....	35
	3.1.1 Mid-Span Concentrated Load.....	35
	3.1.2 Symmetrical Double Loads.....	37
	3.2 Comparison of Finite Element results with Modified Equations.....	38
	3.2.1 Mid-Span Concentrated Load.....	38
	3.2.2 Symmetrical Double Loads.....	39
	3.2.3 Constant Moment.....	40

	3.3 Modification of Present Design with Bracing at Load Position.....	42
	3.3.1 Mid-Span Concentrated load with bracing at load position.....	43
	3.4 Study of Cope Length for Short Span Cope I-Beam.....	44
4	Comparison of The Results Predicted by the Modified Equations with Experimental Results.....	70
	4.1 General.....	70
	4.1 Experimental Study of Lateral Torsional Buckling Capacity of Coped I-Beam.....	70
	4.3 Comparison of Test Results with the Modified equations.....	71
5	Summary and Recommendations.....	77
	5.1 Summary.....	77
	5.2 Recommendations.....	78
	5.3 Future Research.....	81
Part II	Experimental Investigation of the Local Web Buckling Strength of Coped I-Beams.....	82
6	Design of Test Specimen and Test Setup.....	83
	6.1 Scope.....	83
	6.2 Test Specimens.....	83
	6.2.1 Tension Coupon Tests.....	85
	6.3 Test Setup.....	85
	6.4 Instrumentation.....	86
	6.5 General Test Procedure.....	87
	6.6 Presentation of Test Results.....	87
7	Test Results of Specimens Without Stiffeners.....	104
	7.1 General.....	104

	7.2 Behaviour of Load versus In-plane Deflection	104
	7.3 Strain Gauge Results.....	105
	7.4 Behaviour of Load versus Out-of-plane Deflection of Web and its Deflected Shape.....	107
8	Test Results of Specimens With Stiffeners.....	129
	8.1 General.....	129
	8.2 Behaviour of Load versus In-plane Deflection.....	129
	8.3 Strain Gauge Results.....	130
	8.4 Behaviour of Load versus Out-of-plane Deflection of Web and its Deflected Shape.....	131
9	Discussion and Comparison of Test Results.....	152
	9.1 Introduction.....	152
	9.2 Effect of Cope Depth to Beam Depth Ratio.....	152
	9.3 Effect of Horizontal Stiffeners.....	153
	9.4 Comparison of Test Results with Present Design Methods...	154
10	Summary and Conclusions.....	165
	10.1 Summary of Elastic Lateral Torsional Buckling Behaviour of Coped I-Beam.....	165
	10.2 Summary of Local Web buckling Behaviour of Coped I- Beam.....	166
	References.....	168
	Appendix I.....	170
