Abstract vi

Table of Contents viii

Nomenclature xi

List of Tables xiii

List of Figures xiv

Chapter 1 Introduction 1

1.1 Background and Problem Statement 1

1.2 Objectives 3

1.3 Layout of the Thesis 3

Chapter 2 Literature Review 5

2.1 Introduction 5

2.2 Micro and Macro Features of Granular Materials 6

2.3 Discrete Element Method 7

2.4 Mechanical Response of Granular Materials 10

2.4.1 Stress-Strain Characteristics 10

2.4.2 Hardening-Softening behavior 11

2.4.3 Critical State 11

2.4.4 Dilatancy of Cohesionless Soils 12

2.5 State-Dependent Dilatancy Model 13

2.5.1 General Expression for State-Dependent Dilatancy 13

2.5.2 Particular Expression of State-Dependent Dilatancy 16

2.5.3 A Simple Model for Triaxial Compression 16

2.5.4 Calibration of Model Constants 18

2.6 Summary 22

Chapter 3 Numerical Experiment 33
3.1 Introduction 33
3.2 Representative Volume Element 33
3.3 Input Parameter Calibration 33
3.3.1 Effect of Number of Particles and Size of RVE 34
3.3.2 Effect of the Ball Stiffness 34
3.3.3 Effect of the Boundary Wall Stiffness 37
3.4 Testing Procedures 37
3.4.1 Specimen Generation 38
3.4.2 Initial Stress 38
3.4.3 Triaxial Shearing 39
3.5 Tests Conducted in the Simulation 39
3.6 Summary 40
Chapter 4 Summary of Simulation Results 53
4.1 Introduction 53
4.2 Mono-size Spheres 53
4.3 Graded Materials 55
4.4 Comparison of Three Different Particle Grading 58
4.4.1 Stress Strain Characteristics 58
4.4.2 Strain-Hardening Behavior 59
4.4.3 Critical State Line 59
4.4.4 Dilatancy Behavior 60
4.5 Summary 61
Chapter 5 Physical Significance of Model Parameters 73
5.1 Introduction 73
5.2 Calibration of Model Constants 73
5.3 Simulation by Elastoplastic Continuum Model 73
5.4 Physical Significance of Model Parameters 74
5.4.1 Elastic Parameters 74
5.4.2 Hardening Parameters 75

5.4.3 Critical State Parameters 76
5.4.4 Dilatancy Parameters 77
5.5 Validate of the Effect of c_u on Model Parameters 78
5.6 Summary 79
Chapter 6 Conclusions 96
6.1 Overview 96
6.2 Interpretation of Graded Materials Behavior 96
6.3 Elastoplastic Continuum Model and Model Parameters' Investigation 97
6.4 Proposed Future Work 99
