**Computer Aided Design of Steel Structure to REAE
(Code of Structural Steel for Buildings, Macau Standard)**

by

Vong Man Kit

Master of Science in Civil Engineering

2005

**Faculty of Science and Technology
University of Macau**

TABLE OF CONTENTS

List of Figures	v
List of Tables	x
Chapter 1 Introduction	1
1.1 Introduction	1
1.2 Scope	2
1.3 Developing Tools	4
1.4 The Code – REAE	5
1.5 Limitations of REAE	6
1.6 Symbols used in REAE	6
1.7 Conventions for Member Axes	7
1.8 Classification of Cross-Sections	8
1.9 Structure of Program “SD-REAE (ver. 1.0.0)”	10
1.9.1 Design Assumptions	10
1.9.2 Create a Project	10
1.9.3 Data Processing	11
1.9.4 Material and Section Properties Libraries	11
1.9.5 Steel Grade Toolbox	11
1.9.6 Examining Design Results	12
1.9.7 Data Output	12
1.9.8 Central Database	12
1.9.9 Why SAP2000	13

Chapter 2	Design Rules in REAE	14
2.1	Ultimate Limit State Design	14
2.1.1	Tension Member Design	14
2.1.2	Compression Member Design	17
2.1.3	Buckling Resistance of Compression Members	20
2.1.4	Shear Resistance of Cross-Section	22
2.1.5	Beam (Bending) Member Design	22
2.1.6	Lateral Torsional Buckling	26
2.1.7	Shear Buckling of Beams	28
2.1.8	Flange Induced Buckling	30
2.1.9	Resistance of Webs to Transverse Forces	30
2.1.10	Bending, Shear and Axial Forces	34
2.1.11	Buckling Resistance of Combined Bending and Axial Compression	38
2.2	Fire Limit State Design	40
2.2.1	Basic Principles of Fire Resistant Design	42
2.2.2	Material Properties	45
2.2.3	Thermal Properties of Steel	48
2.2.4	Fire Curves	52
2.2.5	Fire Tests	55
2.2.6	Fire Protection Methods	56
2.2.7	Section Classification	62
2.2.8	Resistance of Tension Members	63
2.2.9	Resistance of Compression Members	63
2.2.10	Resistance of Beams	65
2.2.11	Lateral Torsional Buckling	66
2.2.12	Resistance of Members subject to Bending and Axial Compression	67
2.2.13	Critical Temperature	68
2.2.14	Fire Resistance Time of Unprotected Steel Members	70
2.2.15	Fire Resistance Time of Protected Steel Members	72

2.2.16	Use of Advanced Calculation Models	73
Chapter 3	Software Development Research	74
3.1	Introduction of Software Development	74
3.1.1	Spreadsheet Program	75
3.1.2	CAD Application Design	75
3.1.3	Advantages and Disadvantages	76
3.2	GUIs Design	77
3.3	Database Introduction	79
3.3.1	Database Design	80
3.3.2	Normalization	81
3.3.3	Software Selection	82
3.3.4	Access vs, Excel	83
3.4	Design Scheme in SD-REAE	84
3.5	Issues of Using MS Access	85
3.6	Data Structure in the SD-REAE Database	86
3.7	Table Structure of the Database	89
3.7.1	Database Grade	89
3.7.2	Database Sections	90
3.7.3	Database Standard	99
Chapter 4	Software Development Issues and General Discussions	108
4.1	Software Development Issues	108
4.1.1	Issues on developing of section library	108
4.1.2	Issues on serviceability limit state check	113
4.2	General Discussions	114
4.2.1	Discussions on software development	114
4.2.2	Discussions on fire design	116
Chapter 5	Verification Example	125
5.1	Design Assumptions	127

5.2	Parameters Adjustment	127
5.3	Design Procedures	127
5.4	Design Results	132
5.4.1	Software results comparison	132
5.4.2	Software results comparison with advanced settings	136
5.4.3	Design results comparison with hand calculations	140
Chapter 6	Conclusions and Recommendations on Future Research	142
6.1	Conclusions	142
6.2	Recommendations on Future Research	144
6.2.1	Entire System Design	144
6.2.2	Fire Design	145
6.2.3	Interface Design	145
6.2.4	Database Design	145
6.2.5	Further Suggestions	145
References		146
Bibliography		148
Appendix A	Notations	153
Appendix B	Worked Example	163
Appendix C	Fire Design Spreadsheet	227
