University of Macau**

碩士學位論文

用 HPLC-DAD-ESI-MS 定性定量分析靈芝中的 核苷類成分

研究生姓名： 高建莉

導 師： 禹志領 王一濤

專 業： 中 藥 學

日 期： 2005.6

澳門大學中華醫藥研究所

TABLE OF CONTENTS

LIST OF FIGURES	IV
LIST OF TABLES	VI
LIST OF ABBREVIATIONS	VII
INTRODUCTION.....	VIII
CHAPTER 1: REVIEW	1
1.1. Applications of HPLC-ESI-MS in the analysis of nucleotides and nucleic bases.....	1
1.1.1. Summary of nucleotides and nucleic bases	1
1.1.2. Application of HPLC-DAD-ESI-MS in nucleotide analysis	4
1.2. The development and foreground of LZ in QC research.....	7
1.2.1. Summery.....	7
1.2.2. Advance of chemical study	7
1.2.2.1. Triterpene	7
1.2.2.2. Polysaccharide	9
1.2.2.3. Nucleotide	9
1.2.2.4. Amino acid and polypeptide	10
1.2.2.5. Others	10
1.2.3. The background and existing problems of quality control in LZ	12
1.2.3.1. Background	12
1.2.3.2. Existing problems for quality control	13
1.2.3.3. Research prospect	14
CHAPTER 2: QUALITATIVE ANALYSIS ON NUCLEOTIDES IN LZ BY	
HPLC-DAD-ESI-MS	15
2.1. Optimization of chromatogram and mass conditions	15
2.1.1. Apparatus and materials.....	15
2.1.1.1. Apparatus	15
2.1.1.2. Reagent	15
2.1.1.3. Raw materials of LZ	16
2.1.1.4. Standards.....	16
2.1.2. Chromatographic conditions.....	16
2.1.2.1. Chromatographic column.....	16

2.1.2.2. Optimization of mobile phase	17
2.1.2.3. Selection of electrolyte	19
2.1.2.4. Optimization of the concentration of ammonium acetate	20
2.1.2.5. Optimization of detection wavelength	21
2.1.2.6. Optimization of column temperature	21
2.1.2.7. Optimization of injection volume	21
2.1.3. Optimization of mass conditions	25
2.1.3.1. The pressure of nebulizing gas	26
2.1.3.2. Dry gas flow rate	26
2.1.3.3. Dry gas temperature	26
2.1.3.4. Compound stability and collision energy	26
2.1.3.5. The chromatographic conditions and mass spectrometric detection conditions	26
2.2. Qualitative analysis of LZ samples	27
2.2.1. Preparation of samples	27
2.2.1.1. Optimization of the extraction method	27
2.2.1.2. Optimization of the extraction solvent	28
2.2.1.3. Optimization of extraction time	30
2.2.1.4. Extraction and preparation of Sample Solutions	32
2.2.2. Detection of target constituents	32
2.2.2.1. Identification of target constituents	32
2.2.3. Qualitative analysis	38
2.2.3.1. Auto-MS mode	38
2.2.3.2. EIC (extracting ion chromatogram) mode	39
2.2.3.3. MRM (multi-reaction monitoring) mode	41
2.2.3.4. Identification of other unknown constituent	41
2.3. Results and discussions	44
2.3.1. Results	44
2.3.2. Discussions	45
2.3.2.1. The low sensitivity of uracil	45
2.3.2.2. Influence of injection volume on separation	46
CHAPTER 3: QUANTITATIVE ANALYSIS ON NUCLEOTIDES IN LZ BY HPLC-DAD-ESI-MS	48
3.1. Methodology evaluation	48

3.1.1. Apparatus and materials.....	48
3.1.1.1. Apparatus and reagent.....	48
3.1.1.2. Raw materials of LZ	48
3.1.1.3. Chromatographic conditions.....	48
3.1.2. Resolution	49
3.1.2.1. Resolution of mixed standards.....	49
3.1.2.2. Resolution of LZ specimens	49
3.1.3. Precision.....	50
3.1.4. Repeatability	51
3.1.5. Stability.....	52
3.1.6. Calibration graphs.....	53
3.1.6.1. Preparation of stock solutions.....	53
3.1.6.2. Calibration graphs.....	53
3.1.7. Limits of detection (LOD) and Limits of quantitation (LOQ).....	57
3.1.8. Intraday precision and inter-day precision.....	57
3.1.9. Recovery tests	58
3.2. Quantitative analyses of LZ Samples	59
3.2.1. Sample analyses	59
3.2.2. Quantitative analysis.....	59
3.2.2.1. The quantity of nucleotides in LZ samples.....	59
3.2.2.2. The content proportion of the 9 nucleotides in total nucleotide ...	61
3.3. The amount of nucleotides in other fungus.....	63
3.4. Results and discussions.....	64
3.4.1. Results.....	65
3.4.2. Discussions	65
3.4.2.1. The special analysis method developed in this study.	65
3.4.2.2. The resolution of mix standards and LZ sample.....	65
3.4.2.3. The low content of thymine and thymidine in fungus	66
3.4.2.4. The content of uridine and the relationship of uridine and therapeutic capacity of LZ	66
3.4.2.5. The content of adenosine in LZ	66
