Modelling of ASVG System , Simulation and stability Study

by

Wong Chi Kong

A Thesis submitted in partial fulfillment
of the requirement of the Degree of

MASTER OF SCIENCE

in

ELECTRICAL AND ELECTRONICS
ENGINEERING

Faculty of Science and Technology
UNIVERSITY OF MACAU

April 1997

Table of contents

Acknowledgments

Abstract

Chapter 1 : Introduction 1

1.1 Introduction 1
1.2 The concept of ASVG 3
1.2-1 The traditional SVC 3
1.2-2 The basic concept of ASVG 3
1.3 The general structure of ASVG 4
1.3-1 The general structure of ASVG 4
1.3-2 A novel method for connection GTOs in series 7
1.4 The operating principle 9
1.5 The benefit of ASVG 11
1.6 The physical model of 300 KVAR ASVG in Tsinghua University 14

Chapter 2 : Mathematical Model of ASVG System 17

Chapter 3 : The Control Law of ASVG by Applying Linear Optimal Control Theory 24

3.1 Introduction to linear optimal control theory 24
3.2 Brief Introduction of the applying linear optimal control theory in ASVG system 33
3.3 Operating point 35
3.4 Linearization 37
3.5 The control law of ASVG 39
3.6 The controllability of ASVG system 39

Chapter 4 : Simulation 41

4. 1 Steady State Analysis 41
4.1-1 Comparison of the steady state simulation results with the experimental data 41
4.1-2 Mistake in one control method 42
4.1-3 The improvement in precision by considering the loss of ASVG 48

4.2 Small signal stability analysis 49
4.3 Transmission power limitation analysis 53
4.4 Transient Stability 57
4.5 Comparing with PID controller 62

Chapter 5 : The analysis of Parameters 67
5-1 The Contribution of C 67
5-2 The Contribution of X3 70
5-3 The Contribution of R 74

Conclusions 76

Appendix A 77

Appendix B 80
