**An Investigation of Potential Application of
Ground Source Heat Pump Systems for Energy
Saving in Macau**

by

Lai Kin Hou

2002

Faculty of Science and Technology

University of Macau

TABLE OF CONTENTS

LIST OF FIGURES	vii
LIST OF TABLES.....	ix
NOMENCLATURE	xi
ACKNOWLEDGEMENT	xv
CHAPTER 1: INTRODUCTION.....	16
1.1 History of Geothermal Energy.....	18
1.2 Usage of Geothermal Energy.....	18
1.3 Ground Source Heat Pump	20
1.3.1 Ground Coupled Heat Pump	21
1.3.2 Ground Water Heat Pump.....	24
1.3.3 Surface Water Heat Pump.....	26
1.3.4 Water Source Heat Pump.....	27
1.4 Literature Survey.....	29
1.4.1 U-Tube Thermal Resistance.....	32
1.4.2 Soil Properties and Ground Thermal Resistance.....	35
1.4.3 Ground Source Heat Pump System Temperatures.....	39
1.4.4 Pipe Diameter.....	40
1.4.5 Long Term Ground Temperature Change.....	41
1.4.6 Surface Water Heat Pump.....	43
1.4.7 Key Elements of Design	44
1.5 Objectives	45
CHAPTER 2: NUMERICAL MODEL AND DESIGN.....	46
2.1 Cooling Load Calculation.....	46
2.2 HVAC System Selection	48
2.3 Soil Properties in Macau	50
2.4 Measurement of Ground Water	52
2.5 Manual Calculation of borehole length of design building	56
2.6 Computer Simulation of design system.....	61
2.6.1 Application of Eskilson model.....	66

2.6.2 Heat Pump Model.....	68
2.6.3 Analytical approximation for the peak pulse	69
2.6.4 Operation Model.....	70
2.7 Pipe and Piping Design	74
2.7.1 GCHP pipe and fitting head losses.....	79
2.7.2Ground Coil Layout and Design	83
2.8 Headloss Calculation of System	84
2.9 Pump Selection	88
2.10 Schematic Diagram	89
2.11 Comparison of economics of GCHP and traditional HVAC system	92
CHAPTER 3: CONCLUSION AND RECOMMENDATIONS.....	101
