The Use of Neural Networks in Financial Models

By
Wu Sui Vang

A dissertation submitted to the Faculty of Business Administration in partial fulfillment of the requirements for the degree of Master of Business Administration.

University of Macau, June 21, 2001

Contents

Preface iv

Acknowledgements v

1 An introduction to Neural Networks 1

1.1 Historical Notes . . . 2
1.2 The Structure of Neural Networks . . . 10
1.3 The Multi-Layer Perceptron . . . 12
1.3.1 The Delta Rule: The Last Layer's Nodes . . . 14
1.3.2 The Generalised Delta Rule . . . 15
1.3.3 Valuable Characteristics of the MLP . . . 18
1.3.4 Discrete Versus Continuous-Valued Outcomes . . . 21
1.3.5 The Delay-Line MLP for Forecasting . . . 23
1.3.6 The Modern MLP . . . 23
1.4 Self-Organized Neural Maps of Patterns . . . 25

2 Neural Networks in Accounting and Finance Research 28

2.1 Pitfalls and Difficulties . . . 29
2.2 Experiments Using NNs in Accounting and Finance . . . 32

3 The Experiment and Results: Predicting the Direction of Earnings' Changes 35

3.1 Introduction . . . 35
3.2 The Study by Ou (1990) . . . 37
3.3 Data and Methodology . . . 40
3.4 Results . . . 41

4 Discussion: Finance vs. Pattern Recognition 45

4.1 A Framework for Comparison . . . 45
4.2 Neural Networks v. Conventional Statistical Tools . . . 46

4.3 Statistical Considerations 49

5 Conclusions and Recommendations **51**

5.1 Methodological Issues 51

5.2 Potential Useful Contributions 52

5.3 Recommendations to Authors 53
