

**Analytical Investigation of Block Shear of Coped
Beams with Welded Clip Angles Connection**

by

Guo Dong

Master of Science in Civil Engineering

2007

**Faculty of Science and Technology
University of Macau**

TABLE OF CONTENTS

LIST OF FIGURES	iv
LIST OF TABLES.....	viii
CHAPTER 1: Introduction	1
1.1 General.....	1
1.2 Statement of Problem.....	1
1.3 Objectives and Scope.....	2
1.4 Organization of Thesis.....	3
CHAPTER 2: Literature Review	4
2.1 Introduction.....	4
2.2 Current Design Standards	4
2.3 Recent works.....	7
2.4 Summary	10
CHAPTER 3: Finite Element Model and Parametric Study for Double Angle Connection	12
3.1 Introduction.....	12
3.2 Finite Element Model and Calibration.....	13
3.2.1 General.....	13
3.2.2 Element	13
3.2.3 Washer simulation	14
3.2.4 Contact simulation	15
3.2.5 Pretension simulation.....	16
3.2.6 Boundary conditions	17
3.2.7 Material model.....	18
3.2.8 Analysis procedure.....	19
3.2.9 Analysis results and discussion.....	20
3.3 Calculation of Rotational Stiffness of Connections.....	22
3.3.1 General.....	22
3.3.2 Modeling techniques and analysis procedure	23

3.3.3 Analysis results	23
3.4 Parametric Study for Double Angle Connections	25
3.4.1 General	25
3.4.2 Effects of initial rotational stiffness of connections	28
3.4.3 Effects of aspect ratio of web block	32
3.4.4 Effects of material ultimate-to-yield ratio	35
3.5 Summary	37
CHAPTER 4: Analytical Models of a Double Angle Connection	66
4.1 Introduction	66
4.2 Analytical Models for the Moment Rotation Curve of a Double Angle Connection	66
4.2.1 Prediction models for the moment rotation curve of a double angle connection	66
4.2.2 Finite element analyses of double angle connection	69
4.2.3 Comparison of the analytical models against the finite element data	70
4.3 Analytical Models for the Initial and Plastic Stiffness of a Double Angle Connection	72
4.3.1 Analytical model for the prediction of initial connection stiffness	72
4.3.2 Analytical model for the prediction of plastic connection stiffness	74
4.3.3 Determination of the M_0 -parameter	75
4.3.4 Moment-rotation curves obtained by applying the Chisala equation	76
4.4 Summary	76
CHAPTER 5: Design Model and Recommendation	95
5.1 Introduction	95
5.2 Development of Design Model	95
5.3 Evaluation of Proposed Design Equation	101
5.4 Remarks	103
CHAPTER 6: Summary and Conclusions	116

6.1 Summary	116
6.2 Conclusions.....	117
6.3 Recommendations for Future Work.....	118
REFERENCES	119
