

Sub-CellID Based GSM Location System

by

Bian Kai (MA366258)

Master of Electrical and Electronics Engineering

2006

**Faculty of Science and Technology
University of Macau**

TABLE OF CONTENTS

List of Figures	x
List of TABLES	xii
List of Abbreviations	xiii
Chapter 1: Introduction to positioning technology	1
1.1. What is positioning technology	1
1.2. Globe positioning system (gps)	1
1.2.1. Overview of gps.....	1
a) Space Segment (Satellite)	1
1.2.2. Gps positioning services specified.....	2
a) Precise Positioning Service (PPS)	2
b) Differential GPS (DGPS) Techniques	3
1.2.3. Problems of gps techniques	3
1.3. Gsm positioning service.....	5
1.3.1. Overview.....	5
1.3.2. Methodology.....	6
a) Cell ID.....	6
b) E-OTD.....	7
c) Enhanced CGI.....	8
1.3.3. Hybrid model (A-GPS).....	10
1.4. Mobile Value-Added Services	12
1.4.1. Short message services (sms).....	12
1.4.2. Lbs (location-based service)	12
a) LBS solutions.....	13
b) Location terminal of LBS	13
c) Carrier of LBS.....	13
1.4.3. Prospect of lbs.....	14

a) LBS on handset.....	14
b) LBS on private car	14
c) Enterprise use.....	14
1.4.4. Problems of lbs	14
a) The precision of location	15
b) The collection and organization of information.....	15
c) Vector map browser.....	15
Chapter 2: Gsm network and sub-cellid design	16
2.1. Introduction to gsm network.....	16
2.1.1. Cellular structure.....	16
2.1.2. Services provided by gsm	17
2.1.3. Architecture of the gsm network.....	17
a) Mobile Station.....	18
b) Base Station Subsystem	19
c) Network Subsystem	19
2.1.4. Network aspects of gsm	20
2.1.5. Radio resources management	22
a) Handover.....	22
2.1.6. Mobility management	24
a) Location updating	24
2.2. Cellid vs. Sub-cellid technique.....	25
2.2.1. Features of cellid positioning technique	25
2.2.2. Advantages and disadvantages of each solution.....	25
2.2.3. Principle of sub-cellid tehcnique	26
a) Innovation	26
b) Methodology	27
c) Database and Algorithm	29
Chapter 3: a GSM LBS prototype based on sub-cellid.....	31
3.1. A prototype based on sub-cellid technique in Macao S.A.R.	31
3.1.1. System structure.....	31

3.1.2.	System firmware	33
3.2.	Server program.....	34
3.2.1.	Communication layer.....	35
3.2.2.	Data pre-analyzing layer.....	35
3.2.3.	Server kernel	35
3.2.4.	Server database	35
3.3.	GSM module and SMS service.....	35
3.3.1.	Send a sms (sms-submit)	36
3.3.2.	TPDU.....	37
a)	Example of address field.....	37
b)	Example of received SMS	38
3.4.	Data acquirement	38
3.4.1.	Gsm layer1 parameters	39
3.4.2.	Professional gsm network test tool ot290.....	40
a)	Functions of OT290	40
b)	Technical features	40
c)	Captured traces.....	40
d)	Layer 1 replay on PC	41
3.5.	Database design	41
3.5.1.	Location related gsm network parameters	41
3.5.2.	Location and non-location related request database	42
Chapter 4:	Demo and field test.....	43
4.1.	Infrastructure.....	43
4.2.	GSM modem.....	43
4.3.	Server program.....	44
4.3.1.	Initializing	45
4.3.2.	Request analyzing	46
4.3.3.	Server processing	46
4.3.4.	Feedback	47
4.4.	Database acquirement method	47

4.5.	Result with different positioning algorithm.....	50
4.5.1.	Cellid algorithm	50
4.5.2.	Comparison of cellid and sub-cellid algorithm	51
Chapter 5: Conclusion and problems.....		53
5.1.	Conclusion	53
5.2.	Problems	54
Bibliography		56
APPENDIX A: Publication.....		62
