

Interactive Distance Learning Environment with Multicast Support

by

Ji Xiao Fang

1999

**Software Engineering
Faculty of Science and Technology
University of Macau**

INDEX OF CONTENT

CHAPTER. 1	INTRODUCTION	1
1.1	MOTIVATION.....	1
1.2	OBJECTIVES OF THESIS.....	1
1.3	THESIS ORGANIZATION	2
CHAPTER. 2	RELATED WORK	4
2.1	THE EVOLUTION OF DISTANCE LEARNING TECHNOLOGY	4
2.1.1	<i>Traditional Distance Learning</i>	4
2.1.2	<i>Traditional Distance Learning System Constraints</i>	4
2.1.3	<i>Internet Based Distance Learning</i>	5
2.2	CURRENT INTERNET-BASED DL SYSTEM.....	6
2.2.1	<i>General Client Server Architecture for DL Systems</i>	6
2.2.2	<i>Taxonomic Criteria</i>	7
2.2.3	<i>Classification of Current DL Systems</i>	9
2.2.4	<i>System Features Comparison</i>	10
2.3	SUMMARY	11
CHAPTER. 3	IP MULTICAST	12
3.1	SOLUTIONS TO MITIGATE BANDWIDTH SHORTAGE.....	12
3.1.1	<i>Transmission Approaches</i>	13
3.1.2	<i>Advantage of Multicast over Multiple Unicast</i>	17
3.1.3	<i>IP Multicast</i>	19
3.1.4	<i>Mapping IP Multicast Address to Ethernet Multicast</i>	21
3.2	IP MULTICAST PROTOCOLS.....	23
3.2.1	<i>Internet Group Management Protocol (IGMP)</i>	24
3.3	RELIABLE IP MULTICAST	26
3.3.1	<i>Light-weight Reliable Multicast Protocol Features</i>	27
3.3.2	<i>Local Error Recovery in LRMP</i>	28
3.3.3	<i>Flow and Congestion Control</i>	31
3.3.4	<i>Other Features</i>	32
3.4	PROTOCOLS FOR REAL TIME TRANSMISSION	32
3.4.1	<i>Real-Time Transport Protocol Version 2 (RTP)</i>	33
3.4.2	<i>Real-Time Control Protocol (RTCP)</i>	33
3.5	PROTOCOL STACK.....	34
3.6	IP MULTICAST ROUTING SUPPORT.....	36

3.6.1	<i>Multicasting on Concatenated Subnetworks</i>	36
3.6.2	<i>Multicast over Internet --- Routing Issues</i>	37
3.7	MULTICAST BACKBONE	38
3.7.1	<i>Multicast Backbone Topology</i>	39
3.7.2	<i>Participate MBone</i>	40
3.8	MBONE ISSUES IN DISTANCE LEARNING	41
3.9	SUMMARY	42
CHAPTER. 4 INTERACTIVE DISTANCE LEARNING SYSTEM DESIGN		43
4.1	IDEAL DISTANCE LEARNING SYSTEM	43
4.1.1	<i>Requirements for Ideal Distance Learning Environment</i>	43
4.1.2	<i>Fundamental Functionality in Ideal DL System</i>	45
4.2	FUNCTIONAL MODELS OF IDLS	46
4.2.1	<i>Class Information Server</i>	46
4.2.2	<i>Functions of Client</i>	48
4.2.3	<i>Transmission Technology for Different Models</i>	49
4.3	COMMUNICATION BETWEEN SERVER AND CLIENT	51
4.4	SESSION COMMUNICATION CONTROL	53
4.4.1	<i>Function of Session Controller</i>	53
4.4.2	<i>Raise Hand and Permission Control</i>	55
4.4.3	<i>Token Control</i>	55
4.5	CONFERENCE TOOLS DESIGN	59
4.5.1	<i>Pre-prepared Materials Delivery</i>	59
4.5.2	<i>Enhanced Whiteboard Tool</i>	60
4.5.3	<i>Chat Tool Design</i>	61
4.6	SUMMARY	61
CHAPTER. 5 IDLS IMPLEMENTATION		62
5.1	PLATFORM	62
5.2	LIGHT-WEIGHT RELIABLE MULTICAST PROTOCOL API	62
5.3	USER INTERFACE	65
5.3.1	<i>Login Dialog</i>	65
5.3.2	<i>System Interface</i>	65
5.4	SYSTEM IMPLEMENTATION	66
5.4.1	<i>Chat Tool</i>	66
5.4.2	<i>Enhanced Whiteboard Tool Implementation</i>	67
5.4.3	<i>Token Authorization Implementation</i>	72
5.4.4	<i>Prepared Material Organization Implementation</i>	73
5.4.5	<i>Handle the received multicast message</i>	73

5.5	EVALUATION OF DEMONSTRATION	75
5.6	SUMMARY	75
CHAPTER. 6	CONCLUSION	76
BIBLIOGRAPHY		78
APPENDIX A		81
EXAMPLE OF USING LRMP		81
APPENDIX B		87
CLASSES FOR SERVER.....		87
<i>DLServer</i>		87
<i>ServerSocketThread</i>		89
<i>SessionCtrl</i>		95
<i>SharedData</i>		97
CLASSES FOR CLIENT		100
<i>DialogFrame</i>		100
<i>cMsgBox</i>		105
<i>DLClient</i>		107
<i>MessageBox</i>		127
<i>WhiteBoard</i>		128
CLASSES FOR MULTICAST SESSION		150
<i>ChatEventHandler</i>		150
<i>ChatGroup</i>		151
<i>MemberEventHandler</i>		153
<i>MemberShip</i>		153
<i>FileTransfer</i>		155
<i>ImageButton</i>		161
VITA		171
