STUDY ON CHEMICAL CONSTITUENTS AND QUALITATIVE & QUANTITATIVE ANALYSIS OF RHIZOMA COPTIDIS

by

Wang Wei

Master of Science

2007

Institute of Chinese Medical Sciences

University of Macau

碩士學位論文

黃連的化學成分研究以及定性定量分析

研究生姓名：　王　薇

導　　師：　王一濤 教授

專　　業：　中 藥 學

日　　期：　2007.05

澳門大學中華醫藥研究院

CONTENTS

Abstract I

摘　要 III

The Structure of Separated Compounds V

List of Abbreviations IX

Chapter 1: Literature review 1

Section 1: Major chemical constituents 1

Section 2: Pharmacological activities 2

1.1. Antimicrobial and antidiarrheal effects 2

1.2. Anticancer effects 3

1.3. Improve symptom of Alzheimer's disease 5

1.4. Other activities 6

Section 3: Quality control of Rhizoma coptidis 6

Chapter 2: Investigation of chemical constituents from *Coptis chinensis* rhizome 11

Section 1: Structural elucidation of new compounds 11

1.1. Structural elucidation of coptinin A, B, C and D 11

1.1.1. Structural elucidation of coptinin A (**8**) 11

1.1.2. Structural elucidation of coptinin B (**9**) 16

1.1.3. Structural elucidation of coptinin C (**10**) 19

1.1.4. Structural elucidation of coptinin D (**11**) 22

1.2. Structural elucidation of neocoptinin A, B and C 25

1.2.1. Structural elucidation of neocoptinin A (**12**) 25

1.2.2. Structural elucidation of neocoptinin B (**13**) 30

1.2.3. Structural elucidation of neocoptinin C (**14**) 33

Section 2:Structural elucidation of known compounds 36

2.1. Structural elucidation of isoquinoline alkaloids 36

2.2. Structural elucidation of lignans 40

2.2. Structural elucidation of other compounds 44

Section 3: Experiment Section 45

3.1. Instruments and materials 45

3.2. Extraction and isolation 46
3.3. Characterization of isolated compounds from *Coptis chinensis* 48

Chapter 3: Qualitative and quantitative analysis of Rhizoma coptidis by CZE-DAD 51

Section 1: Materials and apparatus 52
1.1 Materials 52
1.2 Instruments 53
1.3 Statistical software 53
Section 2: Methods and results 54
2.1 Preparation 54
2.2 Optimization of PLE procedure 54
2.2.1 Particle size 55
2.2.2 Solvents 55
2.2.3 Temperatures 56
2.2.4 Time 56
2.3 Optimization of the electrophoresis condition 57
2.3.1 Investigation on CE conditions by univariate approach 58
2.3.2 Central composite design (CCD) 60
2.4. Analysis of Rhizoma coptidis by CZE 66
2.4.1. Choice of internal standard 66
2.4.2. Preparation of calibration curves 66
2.4.3. LOD and LOQ 69
2.4.4. Precision 69
2.4.5. Repeatability 70
2.4.6 Recovery 71
2.4.7 Determination the content of 9 compounds in Rhizoma coptidis 72
2.5. Conculsion 74

Chapter 4: Conclusion 75
