

**Numerical Simulation of Foundations on Soil with
Single Reinforcement**

by

Tou Chon Man

Master of Science in Civil Engineering

2008

**Faculty of Science and Technology
University of Macau**

Table of Contents

Nomenclature	v
List of figures	xi
List of Table	xxi
Chapter 1 Introduction	
1.1 Introduction	1
1.2 Background of study	1
1.3 Objectives of study	3
1.4 Organization of thesis	4
Chapter 2 Literature Review	
2.1 Introduction	5
2.2 Types of failure mechanism in reinforced soil foundation	5
2.3 Experimental study on reinforced soil structures	8
2.4 Finite element modeling	24
2.5 Analytical solution	33
Chapter 3 Methodology of numerical modeling	
3.1 Introduction	37
3.2 Soil behavior model	38
➤ 3.2.1 Duncan Hyperbolic model	38
➤ 3.2.2 Three surface kinematics hardening model (3-SKH model)	42
➤ 3.2.3 Translation rule of 3-SKH model	47
➤ 3.2.4 Hardening modulus	52
➤ 3.2.5 Determination model parameters	56
3.3 Geotextile reinforcement model	64
3.4 Interface elements	65
➤ 3.4.1 Use of interface elements	68

Chapter 4 Study of laboratory results using FE method

4.1	Introduction	70
4.2	Finite element model (Element test)	78
4.3	Material and interface properties	79
➤ 4.3.1	Soil properties	79
➤ 4.3.2	Planar Reinforcement	81
➤ 4.3.3	Soil-reinforcement interface	81
4.4	Comparison of the Element Test Results	83
➤ 4.4.1	Comparison of unreinforced soil (Element Tests)	83
➤ 4.4.2	Comparison of Reinforced Soil (Element Tests)	86
➤ 4.4.3	Results of reinforced soil on Type I reinforcing material	86
➤ 4.4.4	Results of reinforced soil on Type II reinforcing material	89
4.5	Finite Element Model (Strip Footing Test)	91
➤ 4.5.1	Comparison of strip footing model test	94
4.6	Selection of numerical model	96
4.6	Summary	100

Chapter 5 Investigation of RSF using plane strain analyses

5.1	Introduction	102
5.2	Preliminary Plane Strain Study of Reinforced Foundation	103
➤ 5.2.1	Mesh Size	104
➤ 5.2.2	Influence of Mesh Density	105
➤ 5.2.3	Selection of Mesh Density	109
➤ 5.2.4	Influence of Mesh Boundaries	116
➤ 5.2.5	Soil-Reinforcement Interface	122
➤ 5.2.6	Analysis with large and small strain formulation	131

Chapter 6 Parametric study of reinforced soil foundation (RSF)

6.1	Introduction	136
6.2	Free-body diagram of reinforced foundation	137
6.3	Influence of first reinforcement layer below foundation	143

➤ 6.3.1	Normalized load-displacement response for various depth of reinforcement	143
➤ 6.3.2	Distribution of normal stress for various depth of reinforcement	146
➤ 6.3.3	Distribution of shear stress for various depth of the reinforcement	148
➤ 6.3.4	Reinforcement force distribution for various depth of the reinforcement	151
➤ 6.3.5	Maximum shear strain for various depth of reinforcement	153
6.4	Influence of the width of the reinforcement	156
➤ 6.4.1	Normalized Load-displacement response for various width of reinforcement	156
➤ 6.4.2	Distribution of normal stress for various width of the reinforcement	158
➤ 6.4.3	Distribution of Shear Stress along for various width of reinforcement	160
➤ 6.4.4	Reinforcement force distribution for to various width of reinforcement	163
➤ 6.4.5	Maximum shear strain for various width of reinforcement	164
6.5	The Influence of the stiffness of the geotextile reinforcement	167
➤ 6.5.1	Load-displacement response due to stiffness of the reinforcement	168
➤ 6.5.2	Distribution of normal stress for various stiffness of reinforcement	170
➤ 6.5.3	Distribution of shear stress for various stiffness of reinforcement	172
➤ 6.5.4	Reinforcement force distribution for various stiffness of reinforcement	175
➤ 6.5.5	Maximum shear strain for various stiffness of reinforcement	176
6.6	Influence of the interface friction angle	178
➤ 6.6.1	Load-displacement response due to interface friction angle	178
➤ 6.6.2	Distribution of normal and shear stress due to variations of interface friction angle	181

➤ 6.6.3	Reinforcement force distribution due to variations of interface friction angle	185
➤ 6.6.4	Maximum shear strain due to variations of interface friction angle	186
6.7	Influence of soil friction angle	188
➤ 6.7.1	Normalized load-displacement response due to different soil friction angles	189
➤ 6.7.2	Distribution of normal stress due to different soil friction angle	191
➤ 6.7.3	Distribution of shear stress due to different soil friction angle	193
➤ 6.7.4	Reinforcement force distribution due to soil friction angle	196
➤ 6.7.5	Maximum shear strain due to variation of soil friction angle	197
6.8	Influence of the width of the foundation	201
➤ 6.8.1	Normalized load-displacement response due to the width of the foundation	201
➤ 6.8.2	Distribution of normal stress due to width of the foundation	204
➤ 6.8.3	Distribution of shear stress due to width of the foundation	206
➤ 6.8.4	Distribution of reinforcement force due to width of the foundation	208
➤ 6.8.5	Maximum shear strain due to width of foundation	209
Chapter 7 Summary and conclusions		
7.1	Summary and conclusions	214
Bibliography		219
