University of Macau

CONTENTS

ABSTRACT III

ACKNOWLEDGEMENTS IV

LIST OF FIGURES VII

LIST OF TABLES X

CHAPTER 1: Introduction 1
1.1 Overview 1
1.2 Application in Face Detection 1
1.3 Methods of Face Detection 2
1.4 Face Detection in still color image 4
1.5 Task of this thesis 7
CHAPTER 2: Skin Color Modeling 8
2.1 Color Space 8
2.2 Skin Color Model 11
2.3 Skin Color Model: based on the Color Space 13
2.4 Implementation: used by MATLAB 18
CHAPTER 3: Skin Region Extraction 21
3.1 Morphology 21
3.2 Implementation with Morphology: used by MATLAB 23
3.3 Image Segmentation 27
3.4 Implementation with Image Segmentation: used by MATLAB 29
3.5 Experimental results 31
CHAPTER 4: Skin Color Model based on Mixture of Gaussians 33
4.1 Introduction 33
4.2 Established the Skin Color Model: based on Mixture of Gaussians 34
4.3 Implement Gaussians Mixture Model by using MATLAB 37
CHAPTER 5: Data elements for the system interface 44
5.1 Concision of the skin region extraction 44
5.2 Definition of Data Elements 46
5.3 MATLAB: Implementation with data elements of system interface 46

CHAPTER 6: Template 48
6.1 A brief summary of template 48
6.2 Features of Template 48
6.3 Building a Template 49
CHAPTER 7: Implement the algorithm of Template Matching 54
7.1 Introduction: pattern matching 54
7.2 An overview of Template Matching 54
7.3 Template Matching with conv2() 57
7.4 Template Matching with normxcorr2() 59
7.5 Face localization 60
7.6 Compare the experimental results: in different templates 62
7.7 Compare the experimental results: in different algorithms of Template Matching 63
7.8 Extension of the candidate region 66
7.9 Detection with Euler number 67
7.10 Experimental Results 69
CHAPTER 8: Optimization 75
8.1 Analysis of processing 75
8.2 Improvement and enhancement 75
8.3 Evaluation 78
CONCLUSION 79
BIBLIOGRAPHY 82
APPENDIX 1: Skin Color Model based on Color Space 83
APPENDIX 2: Skin Color Model based on Mixture of Gaussians 84
VITA 85
