Abstract vi
Introduction ix
Acknowledgements xii
Achievements xiv
Abbreviations xvii
List of Figures xix
List of Tables xxii
Chapter 1. General introduction: phytochemistry, quality control and pharmacology of *Panax notoginseng* 1
1.1 *Panax notoginseng* 1
1.2 Chemical constituents of *P. notoginseng* 2
1.2.1 Saponins 3
1.2.2 Decichine 5
1.2.3 Other constituents 5
1.3 Pharmacological study of *P. notoginseng* 6
1.3.1 Bilateral effects on blood coagulation 6
1.3.2 Effects on cardio-cerebrovascular system 7
1.3.3 Effect on central nervous system 11
1.3.4 Miscellaneous 12
1.4 Quality control of *P. notoginseng* 12
1.4.1 Qualitative analysis-authentication of *P. notoginseng* 13
1.4.2 Quantitative analysis-quality evaluation of *P. notoginseng* 14
1.5 Aims of Study 19
Chapter 2. Atheroprotective effect of total saponins of *Panax notoginseng* (PNS) 21
2.1 Antiatherogenic effect of PNS in ApoE deficient mice 22
2.1.1 Introduction 22
2.1.1.1 The pathogenesis of atherosclerosis 22
2.1.1.2 Apolipoprotein E (apoE) deficient mice 22
2.1.1.3 Panax notoginseng and atherosclerosis 23
2.1.2 Materials and methods 23
2.1.2.1 Animals and treatment 23
2.1.2.2 Quality control of tested PNS sample 24
2.1.2.3 Tissue preparation 25
2.1.2.4 Atherosclerotic lesion assessment 25
2.1.2.5 Serum lipid analysis 25

2.1.2.6 Inflammatory cytokines assay 26
2.1.2.7 Statistical analysis 26
2.1.3 Results 26
2.1.3.1 Chemical characteristics of tested PNS sample 26
2.1.3.2 Effect of PNS on atherosclerotic lesion 27
2.1.3.3 Serum lipid level 28
2.1.3.4 Inflammatory cytokines 28
2.1.4 Discussions 29
2.2 Anti-vascular inflammatory effect of PNS on HCAECs 31
2.2.1 Introduction 31
2.2.1.1 Atherosclerosis and vascular inflammation 31
2.2.1.2 Vascular Inflammation and ICAM-1 /VCAM-1 31
2.2.2 Materials and Methods 32
2.2.2.1 Cell culture 32
2.2.2.2 Preparation of herbal extracts and treatment 32
2.2.2.3 Cell adhesion 33
2.2.2.4 Immunostaining assay 33
2.2.2.5 Cell ELSIA 34
2.2.2.6 Real time RT-PCR analysis 34
2.2.2.7 Statistical analysis 35
2.2.3 Results and discussions 35
2.2.4 Summary 39
2.3 Anti-vascular inflammatory effect of PTS and PDS on HCAECs 40
Chapter 3. Phytochemical study of *Panax notoginseng* 42
3.1 Separation of 20(*S*)-protopanaxatriol and 20(*S*)-protopanaxadiol type saponins from *P. notoginseng* 43
3.1.1 Introduction 43
3.1.2 Materials and methods 44
3.1.2.1 Sample, Chemicals and reagents 44
3.1.2.2 Adsorbents 44
3.1.2.3 Moisture content of resins 44
3.1.2.4 Preparation of crude extracts using Pressurized Liquid Extraction 45
3.1.2.5 HPLC analysis 45
3.1.2.6 Procedure for the batch static adsorption and desorption tests 46
3.1.2.7 Procedure for dynamic adsorption and desorption tests 47
3.1.3. Results and discussions 47
3.1.3.1 HPLC-UV analysis 47
3.1.3.2 Adsorbents capability of different resins 48

3.1.3.3 Adsorption isotherms 49
3.1.3.4 Adsorption kinetics on DS-401 51
3.1.3.5 Optimization of ethanol concentration 51
3.1.3.6 Breakthrough volume 52
3.1.3.7 Dynamic desorption curve on DS-401 resins 53
3.1.3.8 Large-scale preparation of PTS and PDS from P. notoginseng 55
3.1.4 Large-scale preparation of PTS and PDS from PNS 55
3.1.5 Summary 57
3.2 Standardized preparation of notoginsenoside R1, ginsenoside Rg1, Re, Rb1 and Rd from *P. notoginseng* 58
3.2.1 Introduction 58
3.2.2 Materials and methods 59
3.2.2.1 Sample and Chemicals 59
3.2.2.2 Apparatus and chromatographic conditions 59
3.2.2.3 Sample preparation for pre-HPLC separation. 60
3.2.2.4 Structural confirmation of ginsenosides 61
3.2.3 Result and discussion 61
3.2.3.1 Optimization of composition of mobile phase 61
3.2.3.2 Optimization of flow rate 62
3.2.3.3 Optimization of sample loading 63
3.2.3.4 Pre-HPLC separation 64
3.2.3.5 Confirmation of chemical structures 66
3.2.4 Summary 67
3.3 Separation of other interested compounds from *P. notoginseng* 68
3.3.1 Introduction 68
3.3.2 Materials and methods 68
3.3.2.1 Sample and Chemicals 68
3.3.2.2 pre-HPLC separation 69
3.3.2.3 Purity test 69
3.3.2.4 Structures elucidation 70
3.3.3 Results and discussions 70
3.3.4 Summary 76
Chapter 4. Study on quality control of *Panax notoginseng* 77
4.1 Determination of 11 saponins from *P. notoginseng* using HPLC-ELSD 78
4.1.1 Introduction 78
4.1.2 Materials and Methods 78
4.1.2.1 Materials and chemicals 78
4.1.2.2 Apparatus and chromatographic conditions 79

4.1.2.3 Pressurized liquid extraction 79
4.1.2.4 Calibration curve 80
4.1.2.5 Precision and accuracy 80
4.1.2.6 Limits of detection and quantification 80
4.1.3 Results and discussions 81
4.1.3.1 Optimization of HPLC-ELSD conditions 81
4.1.3.2 Validation of the developed method 83
4.1.3.3 Quantification of saponins in P. notoginseng 85
4.1.4 Summary 86
4.2 Chromatographic fingerprint of *P. notoginseng* using HPLC-UV 88
4.2.1 Introduction 88
4.2.2 Materials and Methods 89
4.2.2.1 Materials and chemicals 89
4.2.2.2 Sample preparation 89
4.2.2.3 Apparatus and chromatographic conditions 89
4.2.3 Results and discussions 89
4.2.3.1 Detector chosen for monitoring 90
4.2.3.2 Optimization of chromatographic conditions 90
4.2.3.3 Method validation 91
4.2.3.4 Typical peaks in the HPLC fingerprint of P. notoginseng 91
4.2.3.5 Chromatographic fingerprint of P. notoginseng 92
4.2.4 Summary 93
4.3 Chemical characteristics for different parts of *P. notoginseng* 94
4.3.1 Introduction 94
4.3.2 Materials and Methods 94
4.3.2.1 Materials and chemicals 94
4.3.2.2 Sample preparation 95
4.3.2.3 Apparatus and chromatographic conditions 95
4.3.2.4 Data analysis 96
4.3.3 Results and discussions 96
4.3.3.1 HPLC separation of saponins in P. notoginseng 96
4.3.3.2 Chemical characteristics of different parts from P. notoginseng 98
4.3.4 Summary 104
4.4 Qualitative analysis of different parts of *P. notoginseng* using HPLC-ESI-MS/MS 106
4.4.1 Introduction 106
4.4.2 Materials and Methods 106
4.4.2.1 Materials and chemicals 106

4.4.2.2 Pressurized liquid extraction 108
4.4.2.4 HPLC-ESI-MS/MS analysis 109
4.4.3 Results and discussions 109
4.4.3.1 Optimization of HPLC-ESI-MS/MS condition 109
4.4.3.2 HPLC-UV-MS analysis of reference compounds 110
4.4.3.3 HPLC-UV-MS analysis of different parts from P. notoginseng. 114
4.4.4 Summary 121
Chapter 5. General conclusions 122
5.1 Pharmacological study 122
5.2 Phytochemical study 123
5.3 Quality control 125
5.4 Selling points 127
5.5 Summary 128
Reference 129
Appendix 140
Appendix I: NMR data of compounds isolated from *P. notoginseng* 140
Appendix II. HPLC-ELSD chromatograms of the root of *P. notoginseng*. 162
Appendix III. HPLC-UV chromatograms of the root of *P. notoginseng* 169
Appendix IV. HPLC-ELSD profiles of flowers of *P. notoginseng* 176
