ETS Measurements and Ventilation Strategies for Indoor Environment

by

Wong Kit Iong

Master of Science in Electromechanical Engineering

2008

Faculty of Science and Technology
University of Macau

TABLE OF CONTENTS

LIST OF FIGURES vi
LIST OF TABLES vii
LIST OF ABBREVIATIONS ix
ACKNOWLEDGEMENT x
CHAPTER 1: Introduction 1
1.1 Importance of Smoking Control 6
1.2 Definition and characterisitics of ETS 6
1.3 Health Effect of ETS 7
1.4 Factors Affecting the concentration of ETS 13
1.4.1 Number of smokers and pattern of smoking 13
1.4.2 The volume of the space, ventilation rate and effectiveness of the air distribution 14
1.4.3 The type and efficiency of the air filtration system 14
1.5 General Control Strategy Of ETS In different Countries 14
1.5.1 Ban Smoking in the Indoor Environmental 15
1.5.2 Smoking only in Isolated Environment 15
1.5.3 Smoking in Separate but not Isolated Environment 16
1.5.4 Totally mixed Environment for both Smokers and Non-Smokers 16
1.6 Objective 17
CHAPTER 2: Exerimental Investigaion 18
2.1 Category of public places to be investiated 18
2.2 Monitored Parameters 19
2.2.1 Measurement Method and Equipment 23
2.3 Investigation Strategy 25
2.3.1 Public Place with Smoking Ban 26
2.3.2 Public Place with Mixed Smoking Policy 30
2.3.3 Public Place with Smoking in Separate but not isolated environment 36

2.4 Summary of the Investigation 41
CHAPTER 3: Proposed smoking policy in Macau 46
3.1 Isolated smoking environment.....46
3.2 Requirements for Isolated environment.....47
3.2.1 Civil construction.....47
3.2.2 Connection between smoking zone and non-smoking zone.....49
3.2.3 HVAC system 51
3.2.3.1 Pressure Differential 51
3.2.3.2 Air Exchange Rate and airflow pattern.....53
3.2.3.3 Isolated HVAC system and local exhaust system.....54
3.2.3.4 Anteroom 55
3.2.3.5 Filtration System.....56
CHAPTER 4: Conclusion.....58
BIBLIOGRAPHY.....60
