

**Computer-Aided Calibration for
Compensation Maps of
Engine Management Systems**

by

Chang Fong Long

M. Sc. in Electromechanical Engineering

2009

**Faculty of Science and Technology
University of Macau**

TABLE OF CONTENTS

LIST OF FIGURES	iv
LIST OF TABLES.....	vi
LIST OF ABBREVIATIONS.....	viii
Chapter 1 Introduction	1
1.1 Background	1
1.2 Effect on variation of engine conditions and environmental parameters	4
1.3 Compensation control systems	5
1.3.1 Fuel compensation map for inlet air temperature	6
1.3.2 Fuel compensation map for engine temperature	7
1.3.3 Fuel compensation map for battery voltage	8
1.3.4 Fuel compensation map for cranking	9
1.3.5 Fuel compensation map for barometric temperature	10
1.3.6 Ignition compensation map for inlet air temperature	11
1.3.7 Ignition compensation map for engine temperature	12
1.4 Traditional engine compensation map calibration (ECMC)	13
1.5 Review of computer-aided approaches for EMS calibration	13
1.5.1 Engine modeling	14
1.5.1.1 White-box identification technique	15
1.5.1.2 Black-box identification technique	16

1.5.2 Automatic engine set-up optimization 21

1.5.3 Direct search optimization techniques 21

1.6 Research objectives 24

Chapter 2 Proposed Intelligent ECMC methodology.....25

2.1 Classical LS-SVM formulation for nonlinear function estimation.....27

2.1.1 Multi-input/output LS-SVM.....30

2.2 Genetics alogrithm (GA) 32

2.3 Chaos optimization 34

Chapter 3 Data Sampling and Implementation 39

3.1 Experimental setup for data sampling 39

3.2 Selection of ranges 42

3.3 Dimension reduction of input variables 43

3.4 Data classification 47

3.5 Data pre-processing 51

3.6 Training data distribution 51

3.7 Performance output functions 52

3.8 Error functions 56

3.9 Objective function for ECMC optimization 57

Chapter 4 Experimental Results and Evaluation 60

4.1 Modeling results 60

4.2 Optimization results 66

4.2.1 GA optimization results 66

4.2.2 Chaos optimization results 70

4.2.3 Optimization results of GA vs. Chaos 73

4.2.4 Evaluation of results 73

Chapter 5 Conclusions and further developments 75

5.1 Conclusions 75

5.2 Originalities 76

5.3 Recommendations for future work 76

References 77
