**Experiments in Relation to Adaptive Decomposition
of Signals into Mono-components**

by

HO IO TONG

Mathematics

2008

**Faculty of Science and Technology
University of Macau**

Contents

1	General Concept	1
1.1	Hilbert Transform and Circular Hilbert Transform	1
1.2	Analytic signal	3
1.3	Fourier Series	10
1.4	Numerical Circular Hilbert transform	12
1.5	Möbius transforms and finite Blaschke products	17
1.6	Starlike functions	19
1.7	p -valent starlike functions	21
2	Adaptive Decomposition in $L^2([0, 2\pi])$	24
2.1	Empirical mode decomposition	24
2.2	Circular Mono-components	26
A	Matlab m-file	44
	Bibliography	45
