Competition in Chinese Banking System: An Empirical Analysis Based on Panzar-Rosse Model

Liu, Xiao Lu (M-A7-6803-1)

Supervisor: Prof. Zheng, Ming Li

A thesis submitted in partial fulfillment of the requirements for the degree of Master of Social Sciences at the University of Macau.

December 2009

Contents

Abstract i

Declaration ii

Acknowledgements iii

List of Tables vii

List of Figures viii

Chapter 1 Introduction 1

1.1 Research Background 1

1.2 Research Objectives 2

1.3 Empirical Findings 3

1.4 Thesis Structure 4

Chapter 2 Banking System and International Competitiveness 5

2.1 The characteristics of Banks 5

2.2 Brief Introduction of Chinese Banking System 7

2.2.1 History and Structural Reform in Chinese Banking 7

2.2.2 Recent Developments and Structures 9

2.2.3 International Competitiveness 12

2.3 The Competition Test Theory Review 15

2.3.1 Structural Approach 17

2.3.1.1 Concentration Ratio (CRn) 17

2.3.1.2 Hirschman-Herfindahl Index 18

2.3.2 Non-structural Approach 18

2.3.2.1 Lerner Index 18

2.3.2.2 Return On Assets (ROA) 19

2.3.2.3 Panzar-Rosse Statistic 19

Chapter 3 Panzar-Rosse Model 21

3.1 Panzar-Rosse Model and H-statistic 21

3.2 The Advantage and Limitation of P-R Model 25

3.3 Literatures about Competition Using P-R Model 26

Chapter 4 Methodology and Data Description 31

4.1 The Empirical Application of the P-R Model 31

4.2 Data Description 34

Chapter 5 Empirical Estimation and Results 38

5.1 H-statistic Test Based on Pooled Data 38

5.2 Competitive Condition Test Based on Cross-section Data in each year 43

5.3 Test for the Changing of H-statistic after 2003 44

5.4 Conclusions of This Chapter 51

Chapter 6 Market Concentration of Chinese Banking 52

6.1 Market Concentration Ratio 52

6.2 Empirical Test for Market Concentration Ratio 53

Chapter 7 Conclusion 56
