The inhibitory effect of l-tetrahydropalmatine (l-THP) on TNF-alpha-induced adhesion molecule expression in human endothelial cells

by

Yu Nan

Master of Science

2008

Institute of Chinese Medical Sciences
University of Macau

碩士學位論文

左旋四氢巴马汀抗动脉粥样硬化的体外研究

研究生姓名：　于　楠

導　　師：　李銘源

專　　業：　中藥學

日　　期：　2008.6

澳門大學中華醫藥研究所

LIST OF CONTENTS

Introduction.....1
Chapter 1: Review..... 5
1.1 Corydalis yanhusuo W.T.....5
1.1.1 Definition of yanhusuo..... 5
1.1.2 Traditional use of Corydalis yanhusuo W.T.....5
1.1.3 Major chemical constituents..... 5
1.1.4 Research studies on Corydalis yanhusuo W.T And Tetrahydropalmatine..... 12
1.2 Atherosclerosis..... 16
1.2.1 The pathogenesis of atherosclerosis..... 16
1.2.2 Cell types involved in AS..... 20
1.2.3 Adhesion molecules..... 25
1.2.4 Cytokines..... 27
1.2.5 Oxidized LDL.....28
1.2.6 Signal transduction pathways..... 31
1.2.7 Atherosclerosis and adhesion molecules..... 33
1.3 Atherosclerosis animal models..... 33
1.3.1 Atherosclerosis models in vivo..... 33
1.3.2 Atherosclerosis assays in vitro..... 41
Chapter 2: The protective effect of l-THP on AS in vitro..... 44
2.1 Material and methods..... 44
2.1.1 Chemicals and reagents..... 44
2.1.2 Preparation of chemical..... 44
2.1.3 HUVEC culture..... 44
2.1.4 Cell viability assay using MTT.....45
2.1.5 Endothelial cell-leukocyte adhesion assay..... 45
2.1.6 Cell enzyme-linked immunosorbent assay..... 46
2.1.7 Adhesion molecules expression by flow cytometry 47
2.1.8 Western blotting analysis..... 47
2.1.9 RT-PCR..... 48
2.1.10 Immunostaining of p65 expression.....51
2.1.11 Statistical analysis..... 52
2.2 Results..... 52
2.2.1 Effect of l-THP on monocytes adhesion to activated endothelial cells.....52
2.2.2 Determination of inhibitory effect of l-THP on cell surface adhesion molecule expression by cell-ELISA.....54
2.2.3 Determination of inhibitory effect of l-THP on cell surface adhesion molecule expression by flow cytometry.56
2.2.4 Determination of inhibitory effect of l-THP on cell surface adhesion molecule expression by Immunostaining58

2.2.5 l-THP reduced ICAM-1 and VCAM-1 protein in TNF-α-stimulated HUVECs.....59
2.2.6 l-THP inhibited ICAM-1 and VCAM-1 mRNA expression 60
2.2.7 l-THP attenuates nuclear translocation of NF-kB p65 in TNF-α-stimulated HUVECs..... 62
2.3. Discussion and .Conclusion..... 64
2.3.1 Discussion.....64
2.3.2 conclusion.....67
REFERENCES..... 68

List of figures

Fig. 1.1 Structures of Protoberberine alkaloids..... 8
Fig. 1.2 Structures of Aporphine alkaloids..... 10
Fig. 1.3Structures of Protopine alkaloids.....11
Fig. 1.4 Structures of Isoquino-benzazepine.....11
Fig. 1.5 Structures of Bisbenzyl-isoquinoline.....12
Fig. 1.6 Structures of other compound in Corydalis yanhusuo..... 12
Fig. 1.7-1.10. The morphogenetic process of atherosclerosis.....18
Fig. 1.11.. Cardiovascular risk factors and the inflammatory cascade act on the healthy endothelium to promote a pro-inflammatory and prothrombotic phenotype of the endothelium..... 20
Fig .1.12 Hypothetical model of atherogenesis triggered by platelets..... 24
Fig. 2.1. .l-THP suppressed TNF-α induced HUVECs adhesiveness for monocytes 53
Fig.2.2. Cell surface expression of ICAM-1 and VCAM-1 proteins were measured by cell-ELISA..... 55
Fig.2.3 Effect of l-THP on cell surface levels of ICAM-1 and VCAM-1 measured by flow cytometry..... 57
Fig.2.4 Effect of l-THP on cell surface levels of ICAM-1 and VCAM-1 measured by Immunostaining..... 58
Fig.2.5. Effect of l-THP on total cellular protein expression levels of ICAM-1 and VCAM-1 measured by western blot..... 59
Fig. 2.6. Effect of l-THP on adhesion molecules mRNA expression..... 61
Fig. 2.7. Effect of l-THP on p65 translocation..... 63
