

Geotechnical Site Characterization Based on SPT

by

Ng Iok Tong

Master of Science in Civil Engineering

1999

**Faculty of Science and Technology
University of Macau**

TABLE OF CONTENTS

| | |
|---|-----|
| LIST OF FIGURES..... | ii |
| LIST OF TABLES..... | iii |
| CHAPTER 1: Introduction..... | 1 |
| CHAPTER 2: Review of Soil Exploration Design Programmes..... | 4 |
| 2.1 General..... | 4 |
| 2.2 Phases of Soil Explorations..... | 5 |
| 2.3 Fact-Finding Survey..... | 6 |
| 2.4 Preliminary Exploration..... | 7 |
| 2.5 Detailed Exploration..... | 7 |
| CHAPTER 3: Field Investigations..... | 11 |
| 3.1 In-Situ Testing..... | 11 |
| 3.2 The Standard Penetration Test (SPT)..... | 12 |
| 3.2.1 Information Obtainable..... | 18 |
| 3.2.2 Advantages and Disadvantages of SPT..... | 21 |
| 3.3 Location of Sites..... | 22 |
| 3.4 Geological Strata of Sites..... | 23 |
| CHAPTER 4: Probabilistic Modeling of Soil Strata..... | 26 |
| 4.1 Purpose for Modeling..... | 26 |
| 4.2 Probabilistic Soil Strata Description..... | 28 |
| 4.3 Trend Analysis..... | 32 |
| 4.4 Correlation Analysis..... | 34 |
| 4.5 Implications and Applications..... | 41 |
| CHAPTER 5: Quantitative Approach for Planning Site Exploration Programmes.... | 42 |
| 5.1 General..... | 42 |
| 5.2 Traditional Approach for Planning Geotechnical Site Exploration Programmes..... | 43 |
| 5.3 Proposed Quantitative Approach for Planning Geotechnical Site Exploration Programmes | 44 |
| 5.3.1 Prior Geotechnical Information..... | 45 |
| 5.3.2 Geotechnical Information of Macau..... | 48 |

| | |
|---|-----|
| 5.4 Optimum Sampling Distance and Boreholes Spacing..... | 84 |
| 5.5 Minimum Number of Tests and Boreholes Required..... | 84 |
| 5.6 Sample Calculations for Site Exploration Planning..... | 92 |
| 5.7 Some Correlations with SPT..... | 96 |
| 5.7.1 General..... | 96 |
| 5.7.2 SPT-CPT Correlations..... | 97 |
| 5.7.3 Correlation Between Undrained Shear Strength and N Value..... | 103 |
| CHAPTER 6: Quantitative Approach for Estimation of Design Soil Properties.... | 109 |
| 6.1 General..... | 109 |
| 6.2 Types of Variability and Uncertainty in Geotechnical Properties..... | 109 |
| 6.2.1 Natural Inherent Soil Variability..... | 110 |
| 6.2.2 Measurement Variability and Uncertainty..... | 111 |
| 6.2.3 Conversion Uncertainty..... | 112 |
| 6.3 Estimation of In-situ Parameters..... | 112 |
| 6.3.1 Variability Model..... | 113 |
| 6.4 Prediction of Geotechnical Properties for Foundation Design..... | 116 |
| 6.4.1 Transformation Model and Property Prediction..... | 117 |
| 6.4.2 Propagation of Means and Variance through Model..... | 118 |
| 6.5 Numerical Example..... | 121 |
| CHAPTER 7: Conclusions..... | 124 |
| CHAPTER 8: Suggestions For Future Research..... | 126 |
| REFERENCES..... | 129 |
| APPENDIX A: SPT Values for Different Types of soils..... | 133 |
| APPENDIX B: Correlation Distance for Different Types of Soils..... | 144 |
| B.1 Vertical Correlation Distance | 144 |
| B.2 Horizontal Correlation Distance | 183 |
| APPENDIX C: Geological Map of Macau | 187 |
| C.1 Rocks Distribution..... | 198 |
| C.2 Soils Distribution..... | 199 |
| APPENDIX D: Critical Values for Students T-Distribution..... | 200 |
