**SIMULATION OF THE IMPACTS OF
TOPOGRAPHY CHANGE ON FLOW AND
SEDIMENT TRANSPORT IN SURROUNDING
WATERS OF MACAO BY NUMERICAL
MODEL**

by

Chao Hio U

Master of Science in Civil Engineering

2002

Faculty of Science and Technology

University of Macau

TABLE OF CONTENTS

Chapter 1	<i>Introduction</i>	1
Chapter 2	<i>Study Area</i>	3
2.1	Topography information	3
2.2	Hydrology and sedimentation information	4
2.2.1	Character of Runoff	4
2.2.2	Character of tide	4
2.2.3	Character of sediment	5
Chapter 3	<i>Numerical Model</i>	6
3.1	General	6
3.2	Hydrodynamic model – SWFM2D	7
3.2.1	Governing equations	7
3.2.2	Numerical scheme	8
3.2.3	Boundary conditions and handling of dynamic boundary	11
3.3	Model verification examples	12
3.3.1	One-Dimensional dam-break flow test [after Chen (2001b)]	12
3.3.2	Two-dimensional dam-break flow test [after Chen (2001b)]	13
3.3.3	Simulation of flows in the waters surrounding Macao	14
3.4	Cohesion Sediment Transport Model – CSTM2D	14
Chapter 4	<i>Calibration of models</i>	16
4.1	General	16
4.2	Boundary conditions	16
4.2.1	Hydrodynamic Boundary condition	16
4.2.2	Sedimentation boundary condition	17
4.3	Initial conditions	17
4.4	Model parameters for calibration	17
4.5	Verification of hydrodynamic results	18
4.5.1	Comparing with observed data in stations	18
4.5.2	Verification of flow patterns	20
4.6	Verification of suspended sediment transport	20
4.7	Summaries	22
Chapter 5	<i>Application of model</i>	38

5.1	General	38
5.2	Background: Topography changes	38
5.3	Modelling description	39
5.3.1	Boundary conditions and initial conditions	40
Chapter 6	<i>Results and discussion</i>	44
6.1	General	44
6.2	Analysis of flow fields	44
6.2.1	Flow patterns of Ebb tidal currents	44
6.2.2	Flow patterns of Flood tidal currents	48
6.2.3	Comparisons of flow velocity in Points	52
6.3	Analysis of suspended sediment transport	68
6.3.1	Sediment concentration fields during ebb phase	68
6.3.2	Sediment concentration fields during flood phase	69
6.4	Analysis of deposition and erosion trend	74
6.4.1	Deposition/Erosion trend in flood season	74
6.4.2	Deposition/Erosion trend in dry season	75
Chapter 7	<i>Conclusions</i>	78
Chapter 8	<i>Suggestions for further research</i>	80
Chapter 9	<i>Reference</i>	81
