THE STRESS INTENSITY FACTORS FOR DEEP SEMI-ELLIPTICAL SURFACE CRACK IN FINITE-THICKNESS PLATE

A thesis submitted in partial fulfilment
of the requirements for the Degree of

Master of Science
in
Civil Engineering

by

K.M.Kuok

Faculty of Science and Technology
University of Macau

August 2002

Contents

Abstract	i
Acknowledgement	ii
Declaration	iii
1 Introduction and Background	1
1.1 Introduction	1
1.2 Present study	6
2 Literature review	9
2.1 Introduction	9
2.2 Literature review on flat plate with surface crack	10
2.3 Conclusion	12
3 Fracture Mechanics	14
3.1 Historical Background	14
3.2 Stress Intensity Factor, SIF	16
3.3 Griffith's energy balance theory	17
3.4 The Contour Integrals	23
4 The Finite Element Method	31
4.1 Introduction	31
4.2 Mesh Design and refinement	34
4.3 Application of FEM to LEFM	35

4.4	Derviation of SIF based on FEM	38
4.4.1	Displacement Extrapolation Method(DEM)	39
4.4.2	Virtual crack extension	40
5	FEA of cracked plate	48
5.1	FE Modelling of cracked plate	48
5.2	Verification of the FE model	50
5.2.1	Verification with exact solution	51
5.2.2	Verification with existing approximate solution	51
5.3	FE results of cracked plate	51
5.4	Normalised stress intensity factor equation	53
5.5	Conclusion	54
6	Conclusion	77
7	References	79
	Appendix	84
A	Mesh Generator	84
B	MATLAB code for FE modelling	93
C	FORTRAN code for post processing	141
