Artificial Neural Network Short-term Electrical Load Forecasting Techniques

Xu Leyan

1999 June

**Electrical and Electronics Engineering
Faculty of Science and Technology
University of Macau**

TABLE OF CONTENT

Chapter 1	INTRODUCTION	1
1.1	General Background of STLF	1
1.2	Historical Development of Methods For STLF.....	2
1.3	Problems Discussed In This Thesis	4
Chapter 2	FUNDAMENTALS OF ARTIFICIAL NEURAL NETWORKS	7
2.1	Historical Development of Artificial Neural Networks	7
2.1.1	Initial Development Stage	7
	Emergence of Neural Networks.....	7
	Rosenblatt's Perceptron.....	8
	Adaptive Linear Element (Adaline)	9
	Madaline	10
2.1.2	Dilemma Stage	10
2.1.3	Resurgence Stage.....	11
2.1.4	Further Development.....	12
2.2	Biological Basis of Neural Networks	12
2.3	Artificial Neurons.....	13
2.4	Feedforward Neural Networks	14
2.5	Feathers of Artificial Neural Networks	16
2.6	Back-Propagation Algorithm.....	17
2.6.1	Introduction	17
2.6.2	Learning Process.....	18
2.6.3	Derivation of the Back-Propagation Algorithm	19
2.6.4	Training procedure of BP algorithm.....	23
Chapter 3	BASIC BP MODEL WITH TEMPERATURE FOR STLF	25
3.1	Introduction	25
3.2	Architecture of Basic BP Model With Temperature.....	25
3.3	Algorithm Description.....	27
3.4	Experiment Results for Basic BP Model with Temp.....	30
3.5	Problems of the Basic BP Model with Temp.	31
Chapter 4	LOCAL MINIMUM PROBLEM.....	33
4.1	Introduction	33
4.2	Method To Treat Local Minimum Problem.....	33
4.3	Experiment Results Regarding Local Minimum.....	35
Chapter 5	FAST CONVERGENCE TECHNIQUES.....	37
5.1	Variable Learning Rate Method.....	37

5.1.1	Introduction to Variable Learning Rate	37
5.1.2	Momentum Term	38
5.2	Quasi-Newton Method	39
5.2.1	Introduction	39
5.2.2	Classical Newton Method.....	40
5.2.3	Quasi-Newton Method	41
5.3	Experiment Results for VLR and Quasi-Newton	42
Chapter 6	HOLIDAY AND WEEKEND PROBLEM AND TREATMENTS	44
6.1	Introduction	44
6.2	Intelligent Treatment of Holidays and Weekends.....	45
6.2.1	Intelligent Treatment 1	46
6.2.2	Intelligent Treatment 2	47
6.3	Experiment Results for Intelligent Treatment	49
Chapter 7	ABNORMAL DATA PROBLEM	51
7.1	Introduction	51
7.2	Intelligent Preprocessing Data.....	52
7.3	Results for Intelligent Preprocessing Data	53
Chapter 8	CHINESE NEW YEAR PROBLEM	56
8.1	Introduction to Chinese New Year (CNY) Problem.....	56
8.2	Methods for Solving Chinese New Year Problem.....	57
8.2.1	Intelligent Treatment of CNY problem	58
8.2.2	Method of Papalexopoulos	58
8.2.3	Method of Yearly Displacement Compensation.....	58
8.3	Experiment Results for CNY Problem.....	59
Chapter 9	CONCLUSION	62
	REFERENCE	66
Appendix I	Holidays of Macao in 1995-1996.....	69
Appendix II	Source Code Files	70
	Source code of the basic BP based model	70
	Source code of Yearly Displacement Compensation for CNY.....	73
	Source code of the final model.....	75
