**Over-Operating Voltage and Stability Study of a  
Transformerless-Coupled Dynamic Voltage Restorer**

by

**Chi-Seng Lam**

**Master of Science in Electrical and Electronics Engineering**

**12/2005**

**Faculty of Science and Technology  
University of Macau**

## TABLE OF CONTENTS

LIST OF FIGURES .....	iv
LIST OF TABLES .....	ix
GLOSSARY .....	xi
CHAPTER 1 Introduction.....	1
1.1 Power quality .....	1
1.1.1 Introduction of Power Quality Issues .....	1
1.1.2 Detailed Descriptions of Voltage Quality Issues and Standards .....	8
1.1.2.1 Voltage Quality Issues .....	8
1.1.2.2 Voltage Quality Standards .....	13
1.1.3 Danger of the Voltage Quality Problems in Macao.....	18
1.1.4 Practical Voltage Quality Problems in China .....	19
1.1.5 DFACTS Compensators .....	24
1.2 Development of Dynamic Voltage Restorer.....	27
1.2.1 Different DVR DC/AC Structures .....	28
1.2.2 Different DVR AC/DC Structures .....	31
1.2.3 Different DVR Control Strategies and Its Development .....	32
1.2.4 DVR Stability Study .....	35
1.2.5 Existing 220V/10KVA DVR Prototype in Laboratory.....	36
1.3 Works of This Thesis.....	38
CHAPTER 2 Mathematical Model of a Transformerless-Coupled DVR .....	41
2.1 Introduction.....	41
2.2 Inverter & Transformerless-Coupled DVR System Models.....	41
2.3 Different Control Strategies of DVR.....	46
2.3.1 Feedforward Control.....	46
2.3.2 Feedforward with Load Voltage & Current Mode Double Feedback Loops Control Method.....	50
CHAPTER 3 Voltage Swell & Overvoltage Compensation with Unidirectional Power Flow Control Algorithm .....	53

3.1 Basic Principle of Three Conventional Voltage Injection Schemes.....	54
3.1.1 In-Phase Voltage Injection Scheme .....	55
3.1.2 Phase-Invariant Voltage Injection Scheme .....	56
3.1.3 Minimum Energy Injection Scheme .....	57
3.2 Simulation and Discussion of Three Conventional Voltage Injection Schemes .....	58
3.3 Analysis of Swell and Overvoltage Compensation Problems in Three-Phase System Using Three Conventional Voltage Injection Schemes .....	65
3.3.1 Active Power Absorption During Voltage Swell.....	65
3.3.2 Relationship Between DC-Link Voltage Level and Power Loss in Inverter .....	69
3.3.3 Summary of Three Conventional Voltage Injection Schemes.....	73
3.4 Proposed Unidirectional Power Flow Control Algorithm .....	74
3.4.1 Three-Phase Rotate Compensation Angle .....	75
3.4.2 Three-Phase Rotate Compensation Limit .....	79
3.4.3 Final Three-Phase Reference Rotate Angle.....	81
3.4.4 Progressive Phase Rotating Method .....	82
3.4.5 DC-link Safety Operation Issue .....	83
3.4.5.1 General Design Case of DC Storage Capacitor Rating .....	86
3.4.5.2 Case Study of DC Storage Capacitor Rating in an 110V/5kVA System.....	89
3.4.5.3 Alleviated Solutions for Unavoidable DC-link Excess Voltage Rise .....	92
3.4.6 Control Block Diagram of Unidirectional Power Flow Control Algorithm.....	92
3.5 Simulation & Discussion .....	94
3.6 Summary .....	100
CHAPTER 4 Per-Unit Design of A Transformerless–Coupled DVR and Its Practical Operation Issues.....	103
4.1 Introduction.....	103
4.2 DVR Stability Study .....	105

4.3 DVR Voltage Harmonics Compensation Capability .....	109
4.4 DVR Load Adaptability .....	111
4.5 DVR Response Time .....	112
4.6 Capacity Determination of DVR System.....	113
4.7 Practical Consideration of DVR system. ....	114
4.8 Simulation Results on A 1kVA, 10kVA and 100kVA DVR Model & System performance with Load Consideration.....	123
4.9 Summary .....	129
CHAPTER 5 Experimental Study of Dynamic Voltage Restorer .....	131
5.1 Introduction.....	131
5.2 Detail of DVR Experimental Prototype.....	132
5.2.1 DVR System Configuration.....	132
5.2.2 Digital Control System of DVR System.....	134
5.2.2.1 Hardware Configuration .....	134
5.2.2.2 Software of Digital Control System.....	136
5.3 Experimental Results .....	140
5.3.1 Unbalanced Swell Experiment.....	141
5.3.2 One-Phase Open Experiment.....	145
5.3.3 Proposed Unidirectional Power Flow Control Algorithm When $K$ Decreases to 50 degree/s .....	149
5.4 Summary .....	150
CHAPTER 6 Conclusion .....	153
BIBLIOGRAPHY .....	155
APPENDIX A: Source Code for DSP Program with Proposed Unidirectional Power Flow Control Algorithm .....	162
APPENDIX B: Publications .....	184
APPENDIX C: Award .....	186
