

Time Domain Approach in Time Series Analysis

by

Lam Vai Iam

Master of Science in Mathematics

2000

**Faculty of Science and Technology
University of Macau**

Contents

List of Figures.....	ii
List of Tables.....	iii
Chapter 1 Introduction.....	1
1.1 The Origins of Time Series.....	1
1.2 Primitive Ideas.....	2
1.2.1 Hidden Periodicities.....	3
1.2.2 The Error Term.....	4
1.3 The Origins of Modern Ideas.....	4
Chapter 2 Stationary Processes.....	6
2.1 Probabilistic Description of random variables	6
2.2 Specification of a Random Process.....	6
2.3 The Autocovariance and Autocorrelation Functions.....	8
2.4 Complex Valued Process.....	10
2.5 Purely Random Processes (Discrete Parameters).....	11
2.5.1 First Order Autoregressive Process	11
2.5.2 Second order Autoregressive Process.....	14
2.5.3 Autoregressive Process of General Order.....	17
2.5.4 Moving Average Process.....	18
2.5.5 Mixed Autoregressive / Moving Average Process.....	19
2.5.6 General Linear Process.....	20
Chapter 3 Estimation in the Time Domain.....	23
3.1 Point Estimation.....	23
3.2 General Methods of Estimation.....	26
3.3 Estimation of Autocovariance and Autocorrelation Functions.....	30
3.4 Estimation of Parameter in Standard Models.....	36
Chapter 4 Applications of Time Series.....	49
Conclusions.....	57
Bibliography.....	58
Appendix.....	60
