

**Frequency Domain Approach to Time Series
Analysis**

by

Mui Chi Seong

Master of Science in Mathematics

2000

**Faculty of Science and Technology
University of Macau**

Table of Contents

List of Figures	ii
Chapter 1: Introduction to Time Series	1
1.1 Examples and fields of applications	1
1.2 Stationary ARMA models	4
Chapter 2: Stationary Processes in the Frequency Domain	12
2.1 The spectrum	12
2.2 The spectrum of ARMA time series	14
Chapter 3: Non-parametric Estimates of the Spectrum	16
3.1 The periodogram	16
3.2 Large-sample properties of the periodogram	26
3.3 Weighted moving average of periodogram ordinates	29
3.4 Confidence intervals for the spectrum	40
Chapter 4: ARIMA Model Building and Parametric Estimates of the Spectrum	43
4.1 Non-stationary processes	43
4.2 Sample autocorrelation function, sample partial autocorrelation function, and AIC criterion	43
4.3 Model selection	45
4.4 Parametric estimates of the spectrum	50
4.5 Conclsions	55
Bibliography	56
Appendix A: Data Sets	58
