

Abstract

Industrial policy law (IPL) is a research issue actively discussed in the economic law field in recent years, and pharmaceutical industry is a vital industry which ensures the public health and promotes the economic development. IPL is applied to pharmaceutical industry in the thesis, which can both provide practical materials based on pharmaceutical industry for the macro and abstract theory of IPL, and demonstrate a new way to improve Chinese pharmaceutical legislation system.

The thesis includes 5 chapters.

Chapter 1 is the theoretical framework and the logical starting point of the whole thesis. It first introduces the definition, the characters and the basic system of IPL, then indicates the inner adjustment mechanism among industrial economy, industrial policy and IPL.

Chapter 2 investigates the situation of the domestic and oversea pharmaceutical industrial policies and their legitimization. The American, Japanese, European and Chinese pharmaceutical industrial policies and laws are introduced, and the low legitimization standard of the Chinese pharmaceutical industrial policies is the basic finding.

Chapter 3 is the analysis of the essentiality of legislating the IPL of Chinese pharmaceutical industry (CPI). The thesis assumes the IPL of CPI should be legislated in terms of the international trends, the disadvantages of policy overflow, the need of industry development, the improvement of pharmaceutical legislation system and the evaluation of administrative reasonableness.

Chapter 4 is the industrial economics analysis of CPI. It objectively demonstrates the situation of CPI from industrial organization, industrial structure, industrial region and industrial technology by applying the industrial economics theory and using a large amount of statistics to provide the comprehensive and real industrial economics materials for the next chapter.

Chapter 5 is the outcome of the project. On a basis of the research contents of the

former four chapters, Chapter 5 sets up the IPL system of CPI which consists of the general rules, the industrial organization rules, the industrial structure rules, the industrial region rules and the industrial technology rules.

Key words: Chinese pharmaceutical industry industrial policy law industrial organization industrial structure industrial region industrial technology
