

**Real Time Control Strategy towards the Robot  
Soccer System**

by

**Hongbin Zhao**

**Master of Science**

**2002.1**

**Faculty of Science and Technology  
University of Macau**

# TABLE OF CONTENTS

<b>LIST OF FIGURES .....</b>	<b>iv</b>
<b>LIST of TABLES .....</b>	<b>vi</b>
<b>LIST of ABBREVIATIONS .....</b>	<b>vii</b>
<b>Chapter 1: INTRODUCTION.....</b>	<b>1</b>
1.1 Motivation .....	4
1.2 Objectives .....	5
1.3 Contributions .....	6
1.4 Outline of the Thesis.....	7
<b>Chapter 2: ROBOT SOCCER SYSTEM .....</b>	<b>9</b>
2.1 Background.....	9
2.2 Why the robot soccer system.....	11
2.3 The performance metric for robot soccer system .....	12
2.4 Categorization.....	12
2.4.1 Simulated Robot Soccer System.....	13
2.4.2 Real Soccer Robot System .....	15
2.5 State-of-Art.....	20
2.6 Challenges provided by the robot soccer system.....	22
<b>Chapter 3: REAL TIME IN THE RSS.....</b>	<b>25</b>
<b>Chapter 4: THREE LAYER STRATEGIC FRAMEWORK .....</b>	<b>27</b>
4.1 Introduction .....	27
4.2 Agent Strategic Architecture .....	30
4.2.1 Classical approaches: Deliberative architecture .....	31
4.2.2 Reactive architecture .....	33
4.2.3 Hybrid architecture.....	34
4.3 Three Layer Strategic Architecture .....	34
4.4 Strategy Layer (Role Layer).....	38
4.4.1 Formations .....	40
4.4.2 Set-Plays .....	41

4.4.3 Roles in the RSS .....	42
4.4.4 Dynamic strategies and Tactics .....	44
4.5 Action Layer .....	45
4.5.1 Action selector .....	47
4.5.2 Basic actions .....	47
4.5.3 Relation of role and action.....	52
4.6 Behavior Layer .....	52
4.6.1 Path Planning .....	52
4.6.2 Obstacle Avoidance.....	53
4.6.3 Behavior Selector .....	53
4.7 Summary.....	54
<b>Chapter 5: SPECIFICATION IN AUML .....</b>	<b>57</b>
5.1 Introduction .....	57
5.2 AUML .....	59
5.2.1 Sequence Diagram.....	60
5.2.2 Statechart Diagram .....	63
5.3 Designing agent with AUML .....	67
5.3.1 Global View of the RSS .....	68
5.3.2 Role Layer Design.....	69
5.3.3 Action Layer Design.....	72
5.3.4 Behavior Layer Design.....	77
<b>Chapter 6: PATH PLANNING .....</b>	<b>79</b>
6.1 Introduction .....	79
6.2 Dynamic path planning.....	81
6.3 Path planning without obstacle avoidance.....	83
6.3.1 Simulation Result .....	87
6.4 Obstacle Avoidance.....	88
6.4.1 Potential Fields Approach .....	89
6.5 Implementation.....	91
6.5.1 Confirm Obstacles .....	93
6.5.2 Get Transform Matrix.....	94

<b>Chapter 7: REINFORCEMENT LEARNING AND COOPERATION .....</b>	<b>99</b>
7.1 Reinforcement learning .....	99
7.1.1 Introduction .....	99
7.1.2 Elements of Reinforcement Learning.....	102
7.1.3 Standard RL Model .....	105
7.1.4 Models of Optimal Behavior .....	107
7.1.5 Difficulties in RL.....	108
7.1.6 Q-learning.....	111
7.1.7 Realted Work.....	112
7.2 Implementing RL.....	113
7.2.1 The Learning Task.....	113
7.2.2 The Q Function.....	113
7.2.3 Training the Agent.....	114
7.2.4 Generlisation of the State Space .....	114
7.3 Initial Results.....	115
7.4 Summary.....	118
<b>Chapter 8: CONCLUSION AND FUTURE WORK .....</b>	<b>119</b>
8.1 Contributions .....	119
8.2 Future Works .....	120
8.2.1 Strategic Architecture .....	120
8.2.2 Team Skills .....	121
<b>APPENDIX A: SimuRosot(3v3).....</b>	<b>126</b>

## LIST OF FIGURES

<i>Number</i>	<i>Page</i>
Figure 1. 1 Multi-agent systems .....	1
Figure 1. 2 Mars Rover.....	5
Figure 1. 3 Build Strategy Method .....	7
Figure 2. 1 Overall the system.....	14
Figure 2. 2 The interface of the soccer server .....	15
Figure 2. 3 Overview of a robot soccer system with vision system, .....	17
Figure 2. 4 System Architecture .....	18
Figure 2. 5 Soccer robots.....	19
Figure 4. 1 A centralized robot soccer system.....	28
Figure 4. 2 Decentralized system .....	29
Figure 4. 3 A typical deliberative architecture .....	32
Figure 4. 4 A typical reactive architecture. ....	34
Figure 4. 5 The 3-layer Strategic Architecture .....	36
Figure 4. 6 The Field Division.....	42
Figure 4. 7 Action Layer.....	46
Figure 4. 8 Ball interception .....	48
Figure 4. 9 Position for block .....	50
Figure 5. 1 Basic format for agent communication. ....	60
Figure 5. 2 Extensions that support concurrent threads of interaction. ....	61
Figure 5. 3 Multiple techniques to express concurrent communication.....	62
Figure 5. 4 A Statechart .....	65
Figure 5. 5 A concurrent state with two regions.....	65
Figure 5. 6 Example: Synch State .....	67
Figure 5. 7 Global view of the robot soccer system .....	68

Figure 5. 8 Role Layer.....	69
Figure 5. 9 (a) Role change in 3-3 .....	71
Figure 5. 10 (a)Setup mode (b)Defensive mode.....	73
Figure 5. 11 Offensive mode. ....	74
Figure 5. 12 Pass action in AUML .....	75
Figure 5. 13 Dribble action in AUML.....	76
Figure 5. 14 Goalkeeper behavior .....	77
Figure 5. 15 Behavior Layer.....	77
Figure 6. 1 Robot position .....	83
Figure 6. 2 Curve segment motion .....	85
Figure 6. 3 Curve Segment Motion in the Simulation.....	87
Figure 6. 4 Zero-turn and linear motion in the simulation .....	88
Figure 6. 5 Obstacles between the robot and target.....	94
Figure 6. 6 The resultant force.....	96
Figure 6. 7 Obstacle avoidance in the simulation.....	96
Figure 6. 8 The solution to an exception .....	97
Figure 7. 1 The standard reinforcement learning model. ....	105
Figure 7. 2 Implementation of a Learning Agent .....	116

## LIST OF TABLES

<i>Number</i>	<i>Page</i>
Table 1 Reasons to use Multi-agent systems.....	9
Table 2 Comparison of Chess and RoboCup.....	22
Table 3 Data structure for the ball and players.....	37
Table 4 Relation of role and action .....	52
Table 5 Q-learning algorithm .....	111
Table 6 Results for random forward.....	117
Table 7 Results for Q-learning attacker.....	117
