

The Secure Wireless mobile Agent System

by

Sun Kuan Ieong, Gregory

Master of Science in Software Engineering

2003

**Faculty of Science and Technology
University of Macau**

Table of Contents

1	Introduction	7
1.1.	Motivation and Objectives.....	7
1.2.	Thesis Organization.....	8
1.3.	Mobile Agent Technology.....	9
1.3.1.	Remote Procedure Call (RPC).....	9
1.3.2.	Remote Evaluation (RE).....	9
1.3.3.	Mobile Agent (MA).....	9
1.3.4.	Mobile Agent Coordination.....	10
1.4.	Definition, Acronyms and Abbreviation	10
2	Enabling Technologies	12
2.1.	Mobile Agent Technology.....	12
2.1.1.	What is mobile agent	12
2.1.2.	Reasons to use Mobile Agents.....	12
2.1.3.	Agent privacy and integrity	13
2.1.4.	Authorization and access control.....	14
2.2.	Public Key Infrastructure.....	15
2.2.1.	Security principle for commerce	15
2.2.2.	Cryptographic Engines	17
2.2.3.	Cryptographic Keys	17
2.2.4.	Message Digests	19
2.2.5.	Digital Signatures	20
2.2.6.	Encryption Engines.....	22
2.2.7.	Keys and Certificates.....	22
2.2.8.	Certificates.....	24
2.3.	Wireless Application Protocol - WAP.....	26
2.3.1.	WAP hardware architecture.....	26
2.3.2.	WAP software architecture.....	27
2.3.3.	Web Server	29
2.3.4.	Java Servlet.....	30
2.3.5.	Java Servlet Architecture.....	31
2.3.6.	Java LDAP.....	32
2.3.7.	JNDI.....	33
2.3.8.	JNDI Architecture.....	34
2.4.	Java Security.....	35
2.4.1.	The Java Sandbox.....	35
2.4.2.	Applets, Applications, and Programs	36
2.4.3.	Framework of a Java Program.....	36
2.4.4.	Key Management.....	40
2.4.5.	Key Agreement.....	40
2.4.6.	JCE Support for Key Agreement.....	42
3	System Overview.....	45
3.1.	System architecture.....	45
3.2.	System Diagram	46
3.3.	System Components	47
3.3.1.	Use Case Diagram	47
3.3.2.	Class Diagram.....	48
3.3.3.	Sequence Diagram.....	51
3.3.4.	Activity Diagram	52

3.4.	Hardware and Software Requirement.....	54
3.4.1.	Hardware requirements.....	54
3.4.2.	Software requirements.....	54
4	Software Requirement Specifications	55
4.1.	Non Functional Requirements	55
4.1.1.	Product Requirement	55
4.1.2.	Process Requirement	55
4.1.3.	External Requirement.....	55
4.2.	Functional Requirements.....	55
4.2.1.	Service Agent Creation.....	56
4.2.2.	Robust and Fault-tolerant	56
4.2.3.	Service and User Agent Creation	56
4.2.4.	Minimize connection time and network resource occupancy	57
4.2.5.	Agent Dispatch Process	58
4.2.6.	Agent Retract Process.....	59
4.2.7.	Agent Creation Object.....	59
4.2.8.	Agent Communication Platform.....	60
5	Implementation of Security in SWMA.....	60
5.1.	Integrating a Policy Façade	60
5.2.	Understand the SWMA Security Architecture	61
5.3.	Using Signed Classes.....	61
6	Evaluation of Implementation	62
6.1.	Application areas of SWMA	62
6.2.	Results of implementations	62
7	Conclusion.....	66
7.1.	Thesis Conclusion.....	66
7.2.	Contributions	67
8	Future Works	68
9	Bibliography	70
10	Glossary	73
11	List of Figures.....	74
