# Table of Contents

CHAPTER I. INTRODUCTION	1
1.1 Motivation and Aim	1
1.2 The structure of research	2
CHAPTER II. LITERATURE REVIEW	4
2.1 The traditional Ratios	4
1. Sharpe Ratio	4
2. Information Ratio	5
3. Treynor ratio	6
4. Modigliani-Modigliani Ratio	7
5. Jensen ratio	8
2.2 Loss-risk theory	9
1. Loss-risk theory	9
2. Lower-partial-moment (LPM)	11
2.3 The model of fund manager's selectivity ability	12
1. CAPM model Markowitz	13
2. Treynor and Mazuy model	14
3. Henriksson and Merton model	14
4. Summary	15
CHAPTER III. METHODOLOGIES	16

3.1 The scope of research	16
3.2 Source of the data	18
3.3 Research methods	18
1. Test of normal distribution	18
2. Test of beta coefficient	20
3. Performance Evaluation Model	21
4. Test on the ability of fund manager	25
<b>CHAPTER IV. EMPIRICAL RESULTS</b>	<b>27</b>
4.1 Analysis of normal distribution test	27
4.2 Test of validity of beta coefficient	30
4.3 The analysis of fund performance	36
4.4 The evaluation on ability of fund manager	40
<b>CHAPTER V. CONCLUSION AND RECOMMENDATIONS</b>	<b>48</b>
5.1 Conclusion	48
5.2 Restrictions on the research	50
5.3 Recommendations	50
