

Proangiogenic Effect of
Angelica Sinensis, Radix Astragali, Radix Notoginseng
in Zebrafish

by

Rachel, Hui Chao Lin

Master of Science

2004-2006

Institute of Chinese Medical Sciences
University of Macau

碩士學位論文

當歸，黃芪，三七對斑馬魚 促血管新生作用的研究

研究生姓名： 林慧超

導 師： 李銘源

專 業： 中 藥 學

日 期： 2006.6

澳門大學中華醫藥研究所

TABLE OF CONTENTS

<i>Title</i>	<i>Page</i>
ABSTRACT.....	i
ACKNOWLEDGEMENTS.....	iv
TABLE OF CONTENTS.....	vi
LIST OF FIGURES	viii
LIST OF TABLES.....	ix
LIST OF SCHEME.....	x
LIST OF ABBREVIATION.....	xi
CHAPTER I: INTRODUCTION.....	1
1.1 Angiogenesis.....	1
1.2 Characteristics of zebrafish.....	3
1.3 Zebrafish angiogenesis.....	5
1.4 Zebrafish transgenesis.....	8
1.5 The application of zebrafish in pharmacology study.....	11
1.6 Zebrafish for drug target discovery and validation and drug screening	13
1.7 High-throughput drug screening using zebrafish embryos.....	18
1.8 Pharmacological action of Tadtional Chinese Medicines (TCM)	19
1.9 The general objectives of this study	22
CHAPTER II: MATERIALS AND METHODS.....	23
2.1 Maintenance of zebrafish.....	24
2.2 Collection of embryo	24
2.3 Preparation of herbal extracts	24
2.4 Herbal extracts treatment.....	25
2.5 Toxicity testing	25
2.6 Protein microinjection.....	25
2.7 Visual screening.....	26
2.8 Flow cytometry: Quantitative analysis of endothelial cells.....	28
2.9 Qualitative analysis of gene expression: Reverse Transcriptase polymerase chain reaction (RT-PCR)	29
2.10 Quantitative analysis of gene expression: Q-RT- PCR.....	31
CHAPTER III: RESULTS.....	33
3.1 Fluorescence microscopy.....	34

3.1.1 Stimulation of angiogenesis with VEGF as positive control	34
3.1.2 The changes of vessels after drug treatment	36
3.2 Flow cytometry: Quantitative analysis of proportion of endothelial cells in entire zebrafish embryo.....	48
3.3 Qualitative analysis of gene expression: RT- PCR.....	50
3.4 Quantitative analysis of gene expression: Q-RT- PCR.....	52
CHAPTER IV: DISCUSSION.....	54
4.1 Selection of traditional Chinese medicines for screening angiogenic effects.	55
4.2 The main active ingredients of the extracts of TCM	55
4.3 The treatment of the extracts of TCM, and their promoting angiogenesis in zebrafish	57
4.4 Differential effects of three herbs on angiogenesis of zebrafish.....	58
4.5 Relationship between proangiogenic effects of TCMs and its clinical efficacies	58
4.6 The extracts of <i>Radix Angelicae Sinensis</i> and <i>Radix Astragali</i> increase the proportion and number of Fli-1 and GFP positive endothelial cell in zebrafish embryo by flow cytometry analysis	59
4.7 The extracts of <i>Radix Angelicae Sinensis</i> and <i>Radix Astragali</i> promote angiogenesis through up-regulating the survivin gene expression	60
4.8 Visual screening, morphological observation and molecular marker analysis.....	61
4.9 The determination of optimized age of zebrafish embryos for different experiments	62
4.10 Other studies on the effects of the <i>Radix Angelicae Sinensis</i> , <i>Radix Astragali</i> and <i>Radix Notoginseng</i> on angiogenesis.....	62
REFERENCES OF LITERATURE CITED	65
APPENDICES	71
Appendix 1: DIC images of live zebrafish at different development stages. The time after fertilization is given in hours (h) when raised at 28.5°C	71
Appendix 2. The results of ECs cycle using Flow cytometry. A is control, B is treated with <i>Radix Astragali</i> , C is treated with <i>Radix Angelicae Sinensis</i>	72
Appendix 3. The formation of CAM. A is control, B is treated with drug.....	73
