

**Simultaneous Removal of Organics and Nitrogen
from Macau Wastewater Using Sequencing Batch
Reactor**

by

IU, Kin Pong (Dickon)

Master of Science in Civil Engineering

2006

**Faculty of Science and Technology
University of Macau**

CONTENTS

VITA.....	ii
ABSTRACT	iii
LIST OF FIGURES	v
LIST OF TABLES.....	vi
LIST OF ABBREVIATIONS.....	vii
ACKNOWLEDGEMENTS.....	ix
CHAPTER ONE: INTRODUCTION.....	1
CHAPTER TWO: BIOLOGICAL WASTEWATER TREATMENT WITH SEQUENCING BATCH REACTOR.....	4
2.1 Organics and Nitrogen Compounds of Interest	4
2.2 Biological Nitrification and Denitrification.....	6
2.3 Sequencing Batch Reactor.....	7
2.3.1 Effect of Electron Donors and Acceptors	7
2.3.2 Effect of Temperature.....	8
2.3.3 Effect of pH	9
2.3.4 Effect of Oxygen.....	10
2.3.5 Effect of Inhibitors.....	10
2.4 Wastewater Treatment Method in Taipa WWTP, the UNI-Tank System.....	12
CHAPTER THREE: MATERIALS AND METHODS	14
CHAPTER FOUR: RESULTS AND DISCUSSIONS.....	27
4.1 SBR Performance in a Six-hour Cycle	27
4.2 SBR Performance in a Nine-and-a half-hour Cycle	28
4.3 SBR Performance in a Ten-hour Cycle with Anoxic Fill.....	32
4.4 SBR Performance in a Ten-hour Cycle with Aerobic Fill.....	33
4.5 Effect of External Carbon upon Nitrate Removal	33
4.6 Effect of Shortened Aerobic React Period.....	35
4.7 Wastewater Treatment Efficiency in Macau WWTPs.....	36
4.8 Salinity Effect	36
4.9 Bacterial Identification	37
CHAPTER FIVE: CONCLUSION	40
CHAPTER SIX: RECOMMENDATIONS FOR FUTURE RESEARCH.....	43
BIBLIOGRAPHY.....	44
APPENDIX.....	48
