

**WIND-INDUCED RANDOM VIBRATION
ANALYSIS OF CABLE-STAYED BRIDGE
WITH FINITE STRIP ELEMENTS**

by

Wong Weng Heng

Master of Science Degree of Civil Engineering

2000

**Faculty of Science and Technology
University of Macau**

TABLE OF CONTENTS

LIST OF FIGURES.....	iii
LIST OF TABLES	v
CHAPTER 1: Compound Finite Strip and Finite Element Method	1
1.1 Displacement function of box girder	1
1.2 Stiffness matrix, mass matrix and load vector of box girder	4
1.2.1 Stiffness matrix of the flat shell strip	4
1.2.2 Mass matrix of the flat shell strip	7
1.2.3 Evaluation of the integral factor I_1	8
1.2.4 Coordinate transformation of the flat shell strip.....	9
1.3 The strip with cable support.....	10
1.3.1 Stiffness matrix of the cable	10
1.3.2 Mass matrix of the cable	14
1.4 Pylon	15
1.4.1 Stiffness matrix of the pylon	15
1.4.2 Mass matrix of the pylon.....	18
CHAPTER 2: Linear Theory of the Wind Loads	19
2.1 Self-Excited loads.....	19
2.2 Buffeting loads-Turbulence	25
CHAPTER 3: Governing Equations and Spectral Analysis.....	28
3.1 Governing equations.....	28
3.2 Spectral analysis	30
CHAPTER 4: Numerical Analysis.....	34
4.1 Yong Hoi cable-stayed bridge.....	34

4.2 Free vibration analysis	34
4.3 Wind spectrum	34
4.4 Power spectral density of responses with different number of eigenfunctions and modes	34
4.5 The standard deviation of the displacements	35
4.6 Numerical results for different damping ratio	35
4.7 Numerical results about the velocity of the girder	35
CHAPTER 5: Discussions and Conclusions	58
5.1 Discussions	58
5.2 Conclusions	60
APPENDIX A: References	61
APPENDIX B: Notations	63
APPENDIX C: Program List	65
