University of Macau**

# Table of Contents

LIST OF FIGURES .....	iii
LIST OF TABLES .....	v
CHAPTER 1 Introduction and Background .....	1
1.1 Framed Tube system .....	1
1.2 Characteristics of the Structural Behavior of Framed Tube System.....	3
1.3 Scope of Present Research .....	5
CHAPTER 2 Literature Review .....	8
2.1 Introduction.....	8
2.2 Literature Review on Shear Lag Study.....	11
2.3 Conclusion .....	18
CHAPTER 3 Background Knowledge .....	19
3.1 Bernoulli-Euler Beam Theory.....	19
3.1.1 Beams under Pure Bending.....	20
3.1.2 Beams under Shear Force .....	23
3.2 Timoshenko Beam Theory.....	25
3.3 Derivation of the Stress Formulas through Theory of Elasticity Method .....	28
3.4 Box Beam.....	34
3.4.1 Least Work Solutions of Shear Lag Problems.....	35
3.4.2 Analysis of Shear Lag in Box Beams by the Principle of Minimum Potential Energy .....	44
3.4 Comparison between the above Methods .....	51
CHAPTER 4 Analyses of Tube-in-tube Structures Coupled with Outrigger and Belt truss.....	53
4.1 Parametric Analysis of Framed Tube Structures without Internal Tubes through SAP2000.....	53
4.1.1 Structural Modeling .....	53
4.1.2 Numerical Results.....	54

4.2 Framed Tube Structure with One Internal Tube .....	58
4.2.1 Modeling .....	60
4.2.2 Results .....	61
4.3 Tube-in-tube Structure System Combined with Outrigger and Truss belts .....	65
4.3.1 Modeling .....	66
4.3.2 Numerical Results .....	66
CHAPTER 5 Conclusions and Recommendations .....	79
5.1 Conclusions .....	79
5.2 Recommendations for Future Research .....	81
REFERENCE .....	82
APPENDIX A Axial Force Distributions in Columns at the Bases of all the Models .....	86
