University of Macau**

# Contents

<b>1</b>	<b>Introduction</b>	<b>1</b>
1.1	Introduction . . . . .	1
1.2	Brownian Motions and Martingales . . . . .	3
1.3	Stochastic Integration and Stochastic Calculus . . . . .	6
<b>2</b>	<b>The Girsanov's Theorem for Geometrical Brownian Motions</b>	<b>9</b>
2.1	The Mean Shifting Formula and Tilting Formula . . . . .	9
2.2	Girsanov's Theorem for Constant Drift . . . . .	13
2.3	Application to Hitting Times for Brownian Motion . . . . .	15
2.4	Application to the Black-Scholes Model . . . . .	16
<b>3</b>	<b>The Girsanov's Theorem for Itô Diffusion Processes</b>	<b>19</b>
3.1	The Girsanov's Theorem for Bounded Drift . . . . .	19
3.2	The General Girsanov's Theorem . . . . .	22
3.3	Application to General Financial Models . . . . .	26
3.4	Application to Stochastic Differential Equations . . . . .	30
<b>4</b>	<b>The Novikov's Conditions</b>	<b>33</b>
4.1	The Novikov's Theorem:A Power Series Technology . . . . .	33
4.2	The Novikov's Theorem:A Time Change Technology . . . . .	37
4.3	A New Proof of the Novikov's Theorem . . . . .	40
