

Web Service Application

--- Multi-Platform Event-Ticketing System

by

Gu Yongfei

Master of Science in Software Engineering

2002

**Faculty of Science and Technology
University of Macau**

Table of Contents

Part I Introduction	1
Chapter 1 Introduction	3
1.1 Motivation	3
1.2 Thesis Organization	4
Part II Background Technologies	7
Chapter 2 Overview of E-Commerce	9
2.1 Advantages of E-Commerce	9
2.2 Types of EC	10
Chapter 3 XML Technologies	11
3.1 Introduction of XML	11
3.2 Advantages of XML	13
3.2.1 design the XML related to various domains	13
3.2.2 XML is a self-description language	13
3.2.3 XML is structure and integrated	14
3.2.4 XML is plat-form independent	14
3.3 XML Syntaxes	15
3.3.1 Declaration and Root element	15
3.3.2 Elements and Attributes	16
3.3.3 Comments	17
3.4 DTD	18
3.5 Namespace in XML	19
3.5.1 Why need Namespace	19
3.5.2 Definition of Namespace	20
3.5.3 What does namespace look like?	20
3.5.4 Namespace Scoping and Defaulting	21
3.6 XML Parser	22
3.6.1 DOM: Tree-Based API	23
3.6.2 SAX: Event-Based API	24
3.6.3 Guidelines for using DOM and SAX APIs	25
Chapter 4 Web Services	27
4.1 Introductions to Web Services	27
4.2 Web Services Advantages	28

4.3 Web Services Enablers.....	29
4.3.1 UDDI	29
4.3.2 WSDL.....	30
4.3.3 SOAP	33
4.4 Available Tools to Implement Web Services	37
4.4.1 Microsoft.NET.....	37
4.4.2 J2EE.....	39
Chapter 5 JSP.....	43
5.1 Definition of JSP	43
5.2 Advantages of JSP	44
5.2.1 Content generation is separated from the content displaying.....	44
5.2.2 Emphasis on reusable modules.....	45
5.2.3 Using tags to simplify developing.....	45
5.2.4 Robust and Security.....	45
5.2.5 Portability	45
5.3 JSP Architecture.....	45
5.4 JSP Syntax	47
Chapter 6 J2ME.....	49
6.1 What's J2ME	49
6.2 Why J2ME.....	49
6.3 J2ME Vs WAP	51
6.4 J2ME Technologies	52
6.4.1 J2ME Inside Three Layers.....	52
6.4.2 MIDP	53
6.4.2.1 MIDP User Interface API	53
6.4.2.2 MIDP Abstract Commands.....	54
Part III Practical Implementation.....	57
Chapter 7 Overview of Event-Ticketing Web Service System	59
7.1 ETWS and Client Applications.....	60
7.1.1 XML document as the data store unit.....	61
7.1.2 Web Services Technologies to implement.....	61
7.1.2.1 Supporting Multi-Platform Client Applications	62
7.1.2.2 High flexibility and extensibility.....	62
7.2 Program Generation Module	63

11.2.8 Query.jsp	96
11.3 JSP Client Classes Design	97
11.3.1 ClientController Class	97
11.3.2 ClientShoppingCart Class.....	99
Chapter 12 J2ME Client Application Implementation.....	101
12.1 Environment Introduction.....	101
12.2 MIDP UI Design.....	103
12.2.1 MainForm	103
12.2.2 InfoForm.....	104
12.2.3 ZonesList	105
12.2.4 ZoneForm	105
12.2.5 SeatForm.....	107
12.2.6 CartForm.....	107
12.2.7 AccountForm	108
12.2.8 NoUserForm	108
12.2.9 CheckOkForm	109
12.2.10 QueryForm.....	109
12.2.11 QueryOkForm.....	110
12.3 J2ME Client Classes Design.....	110
12.4 KSOAP Message Generation	112
12.4.1 KSOAP Introduction	112
12.4.2 Class Mapping in KSOAP.....	113
PartIV Future work and Conclusions.....	115
Chapter 13 Conclusions and Future Work	117
13.1 Conclusion.....	117
13.2 Contributions	117
13.3 Future Work	119
