**An English Language Needs Analysis of
Civil Engineering Students at the University of Macau**

**By
Kuok, On Nei Maria do Rosário
M-A2-6307-6**

**Department of English
Faculty of Social Sciences and Humanities
University of Macau**

2006

Contents

Declaration of authorship	i
Abstract	ii
Acknowledgements	iii
Contents	iv
List of Illustrations	vii
<i>Chapter</i>	<i>Page</i>
1. Introduction	1
1.1. Background	3
1.2. Purpose and significance of the study	7
1.3. Scope of the study	8
2. Review of literature	10
2.1. The definition of ESP	11
2.2. Sub-branches of ESP: EAP, EOP, and EST.....	13
2.3. Defining scientific English	15
2.4. Role and difficulties of ESP teachers	18
2.5. Learners' study skills in ESP	20
2.6. Learners' needs in ESP language curriculum	22
2.7. Needs analysis: definition and emergence	23
2.8. Types of needs	27
2.9. Criticisms of needs analysis	30
2.10. Selected previous needs analyses in language studies (1985-2003)	31
2.11. Reflection on the review of needs analysis studies.....	45
2.12. Research questions	47
3. Methodology	55
3.1. Research setting	56
3.2. Research approach	56
3.3. Research design and procedure.....	59
3.4. Description of research instrument: Questionnaires	62
3.5. Description of research instrument: Interviews.....	67
3.6. Description of research instrument: Collection of authentic materials	70
3.7. Data analysis of responses to questionnaires and interviews	70

<i>Chapter</i>	<i>Page</i>
4. Results	73
4.1. Findings from English teacher survey (combined with interview)	74
4.2. Findings from content teacher survey and interviews	79
4.3. Findings from civil engineering student survey and interviews	106
4.4. Comparison of participant views	123
4.5. Interview findings on engineer graduates' and employers' perceptions	134
5. Discussion	144
5.1. State of English in civil engineering studies and employment	145
5.2. Perceived English skills needed in civil engineering studies and the difference in perceptions between the subject teachers and students	146
5.3. Adequacy of the English language training provided by the English support classes for the engineering students	154
5.4. Other implications drawn from the study	156
5.5. Recommendations	159
5.6. Concluding remarks	164
References	167
Appendixes	175
Appendix 1 Summary list of needs analysis in English language studies	176
Appendix 2 Letter of reference by thesis advisor	180
Appendix 3 Questionnaire for civil engineering teachers	181
Appendix 4 Questionnaire for civil engineering students	185
Appendix 5 Questionnaire for English teachers	189
Appendix 6 Summary of syllabus of ENGL190 and 191/English I and II	193
Appendix 7 Questionnaire for civil engineering students (Chinese version)	195
Appendix 8 Interview guide for English teachers	199
Appendix 9 Interview guide for content teachers	200
Appendix 10 Interview guide for civil engineering students	201
Appendix 11 Interview guide for Chemistry/Physics/Economics teachers	202
Appendix 12 Interview guide for civil engineering graduates	203
Appendix 13 Interview guide for local employers	204
Appendix 14 Interview transcription form	205
Appendix 15 Brief contents of the textbook "English for Science"	206
Appendix 16 Statistical results (teachers' perceptions)	208
Appendix 17 Statistical results (students' perceptions)	214
Appendix 18 Final year project draft from content teacher 11	222
Appendix 19 Sample of technical video: The elegant solution	224

Appendix 20	Sample of technical video: Iron and steel production	225
Appendix 21	Final year project draft from content teacher 5	226
Appendix 22	Example of translated news article from content teacher 4	231
Appendix 23	Sample of chemistry laboratory manual 1 (experiment 1)	235
Appendix 24	Sample of chemistry laboratory manual 2 (experiment 25)	245
Appendix 25	Sample of physics laboratory manual	257
