Modeling Swarm Intelligence and Its Applications in Robotics and Optimization

by

Chen Xin

A dissertation submitted for the degree of Doctor of Philosophy
in Electromechanical Engineering

2007

Faculty of Science and Technology
University of Macau

PREFACE xi

1 INTRODUCTION 1

1.1 Motivation 1

1.2 Objectives 2

1.3 Methodology 2

1.4 Major Contributions 3

1.5 Dissertation Outline 3

2 SWARM INTELLIGENCE 5

2.1 Swarm Behavior or Self-Organization in Nature 5

2.2 Characters about Self-Organization System 6

2.3 Swarm Intelligence in Engineering 8

2.3.1 General Description 8

2.3.2 Applications in Engineering 9

3 DESIGN AND MODELING SWARM SYSTEMS IN ROBOTICS 13

3.1 Macroscopic Model 13

3.1.1 Definition of Macroscopic Model 13

3.1.2 Two Instances about Macroscopic Model 14

3.1.3 Summary of Macroscopic Model 33

3.2 Microscopic Model 33

3.3 Summary on Macroscopic and Microscopic Models 35

4 MODELING SWARM SYSTEM FOR COOPERATIVE COLLECTION 37

4.1 Overview 37

4.2 Individual Behaviors of Robots 37

4.3 Mathematical Model 39

4.3.1 How to Deal with the Movements of Robots 39

4.3.2 Hybrid Model of Cooperative Collection 39

4.4 Analysis on Swarm System Performance 44

4.4.1 Markov Properties of Dynamics of Object States 45

4.4.2 Transportation without Obstacle Avoidance 45

4.4.3 Transportation with Obstacle Avoidance 47

4.4.4 The Model with Bounded Perceiving Ability 52

4.5 Conclusion and Practical Application 62

4.5.1 Conclusion of this Swarm System 62

4.5.2 The Application of Swarm Intelligence Using Practical Robot Systems 62

5 PRACTICAL MULTI-ROBOT SYSTEM USING CHARACTERS OF SWARM BEHAVIOR 64

5.1 Overview 64

5.2 Related Work 65

5.3 Description of Formation's Internal Information 66

5.4 Motivation of Formation Control 68

5.5 Individual Control Strategy 69

5.5.1 Dynamic Description of Individual Robot 69

5.5.2 Neural Network Controller 70

5.6 Stability on Formation Control 74

5.6.1 Stability under Invariant Formation Pattern and Invariant Interaction Topology 74

5.6.2 Stability under Variant Formation Patterns and Invariant Interaction Topology 76

5.6.3 Stability under Variant Interaction Topology 80
5.6.4 Simulation about Formation Control with Variant Formation Pattern and Interaction Topology 85
5.7 Path Planning Used in Formation Control 87
5.7.1 Overview on Path Planning 90
5.7.2 Problems Referred in Path Planning with Obstacle Avoidance . . 90
5.7.3 Description for Desired Trajectory of the Leader 91
5.7.4 Path Planning with PSO Algorithm 92
5.7.5 Simulation 95
5.7.6 Problems in Real-time Path Planning 97
5.8 Experimental Studies 97
5.8.1 Mechanical Design 99

6 A MODIFIED PARTICLE SWARM OPTIMIZATION–ANOTHER INDIVIDUAL-BASED SWARM MODEL 101

6.1 Overview 101
6.2 Related Work 102
6.3 Modifications on PSO Based on the Reduced System 105
6.3.1 Motivation of PSO-CREV 105
6.3.2 Introduction on Modifications on the Level of Reduced System . 106
6.4 Particle Swarm Optimization with Controllable Random Exploration Velocity (PSO-CREV) 109
6.4.1 Basic Description of PSO-CREV 109
6.4.2 Convergence Proof on PSO-CREV 110
6.4.3 Properties and Discussions about PSO-CREV 115
6.5 Experimental Setup 121
6.5.1 Test Functions 121
6.5.2 PSO Configurations 124
6.6 Results 125
6.6.1 Results of Benchmark 1 126
6.6.2 Results of Benchmark 2 131

6.6.3 Results of Benchmark 3 131
6.6.4 Summary on Benchmarks 136
6.7 Conclusions 137

7 APPLICATIONS OF PSO-CREV IN NEURAL NETWORK TRAINING 139
7.1 Overview 139
7.2 Related Work on Neural Network Training 139
7.3 Experiments of NN Training Using PSO-CREV 141
7.3.1 Experiment Setup 141
7.3.2 Configurations of all Training Algorithms 142
7.4 Test Results 144
7.4.1 Test 1: Classification Test Using Feed-Forward NN 144
7.4.2 Test 2: Temporal Sequence Generation Using Recurrent NN . . . 146
7.5 Summary of Performance of PSO-CREV in the Tests 146

8 PSO-CREV BASED NEURAL NETWORK PREDICTIVE CONTROL FOR MOBILE ROBOT CONTROL 149
8.1 Overview 149
8.2 Neural Network Predictive Control (NNPC) 150
8.2.1 Related Work 150
8.2.2 Conventional Paradigm of NNPC 151
8.2.3 Problems of NNPC in Real-Time Applications 153
8.3 NNPC Based on PSO-CREV 153
8.3.1 Problems in NNPC Using Conventional PSO 153
8.4 The Algorithm of NNPC Using PSO-CREV 154
8.5 Application on Mobile Robot Control 155
8.5.1 Real Plant and the Structure of NNM 155
8.5.2 NNPC for Mobile Robot 157
8.5.3 Test Setup 157
8.5.4 Simulation Results of NNPCs Using Different Learning Algorithms 159

8.6 Conclusions 163

9 CONCLUSIONS **164**

9.1 Conclusions 164

9.2 Suggested Ideas for Future Research 167

A Candidate's Publications **169**

BIBLIOGRAPHY **172**
