

**Laboratory Study on the Mechanical Behavior of
Tire Chip-Sand Mixtures**

by

Yu Hong Jie

Master of Science in Civil Engineering

2006

**Faculty of Science and Technology
University of Macau**

TABLE OF CONTENTS

List of Figures	v
List of Tables	ix
List of Abbreviations	xi
Chapter 1: Introduction	1
1.1 Background	1
1.2 Objective	2
1.3 Textual Content.....	3
Chapter 2: Review of Literature	5
2.1 Description of Scrap Tires	5
2.1.1 Scrap Tire Composition	5
2.1.2 Crumb Scrap Tires Technology	7
2.1.3 Type of Scrape Tires	7
2.2 Recycling of Whole Tires and Slit Tires.....	8
2.2.1 Soil Reinforcement	8
2.2.2 Soil Retaining.....	9
2.2.3 Erosion Control	9
2.2.4 Crash Barriers	10
2.2.5 Breakwaters.....	10
2.2.6 Artificial Reefs.....	10
2.2.7 Sound Barriers	11
2.3 Shredded Tires, Ground Rubber and Crumb Rubber Application.....	11
2.3.1 Lightweight Fill	11
2.3.2 Thermal Insulation	11
2.3.3 Synthetic Turf	14
2.3.4 Playground Gravel Substitutes.....	14
2.3.5 Cleaning Up Oil Spills.....	15
2.3.6 Chemical Uses	15
2.4 Tire Chips as Lightweight Geomaterial.....	16

2.4.1 Conventional Lightweight Materials.....	16
2.4.2 Advantages of Tire Chips as Lightweight Materials.....	18
2.4.3 Performance Record of Tire Chips as Lightweight Geomaterial in United States	18
2.4.4 Research of Scrap Tire Chips as Lightweight Geomaterial in Hong Kong	20
2.5 Typical Geotechnical Properties of Tire Chips	21
2.5.1 Specific Gravity.....	21
2.5.2 Compaction Density	22
2.5.3 Compressibility	24
2.5.4 Shear Strength	27
2.5.5 Permeability.....	34
2.6 Leachate.....	35
2.7 Possibility of Internal Heating Reaction	36
2.8 Summary	38
Chapter 3: Index Properties and Permeability.....	39
3.1 Gradation	39
3.2 Specific Gravity.....	43
3.3 Limiting Density and Relative Density	44
3.3.1 Minimum Density.....	44
3.3.2 Maximum Density.....	45
3.3.2 Calculation of Relative Density (D_r).....	45
3.4 Permeability.....	46
3.4.1 Testing Equipment and Experimental Procedures	47
3.4.2 Presentation of Test Results	48
3.4.3 Discussion	49
Chapter 4: Compaction and Compressibility Behavior of Tire Chip-Sand Mixtures.....	51
4.1 Compaction Behavior.....	51
4.1.1 Description of Testing Equipment	51
4.1.2 Experimental Procedures.....	52

4.1.3 Calculation and Plotting.....	54
4.1.4 Presentation of Test Results.....	56
4.1.5 Discussion.....	59
4.2 Compressibility.....	59
4.2.1 Description of Testing Equipment.....	60
4.2.2 Experimental Procedures.....	61
4.2.3 Presentation of Test Results.....	63
4.2.4 Discussion.....	64
Chapter 5: Shear Behavior of Tire Chip-Sand Mixtures.....	70
5.1 Description of Testing Equipment.....	71
5.2 Experimental Procedures.....	71
5.2.1 Sample Preparation.....	71
5.2.2 Saturation.....	72
5.2.3 Consolidation.....	76
5.2.4 Shearing.....	76
5.3 Calculation of the Triaxial Testing.....	76
5.3.1 After Construction of Specimen.....	76
5.3.2 After Saturation and Consolidation.....	77
5.3.3 During Shear.....	78
5.3.4 After Shear.....	78
5.3.5 Correction for Rubber Membrane.....	79
5.4 Presentation of Test Results.....	79
5.5 Discussion.....	87
5.5.1 Shearing Behavior of Tire Chip-Sand Mixtures.....	87
5.5.2 Strength Parameters for Tire Chip-Sand Mixtures.....	88
5.5.3 Comparison with the Previous Research.....	91
5.5.4 Membrane Penetration Effect.....	91
Chapter 6: Material Modeling.....	93
6.1 Duncan Hyperbolic Model.....	94
6.1.1 Nonlinear Stress-Strain and Volume Change-Strain Relationships.....	94

6.1.2 Techniques for Determining Values of the Hyperbolic Parameters from Laboratory Test results	99
6.1.3 Presentation of Modeling Results Using Hyperbolic Model.....	103
6.1.4 Discussion of Hyperbolic Modeling Results.....	105
6.1.5 Limitations of Hyperbolic Model.....	107
6.2 Artificial Neural Network	108
6.2.1 Use of ANN to Simulate Soil Stress-Strain Relationships.....	108
6.2.2 Overview of Artificial Neural Networks (ANNs).....	109
6.2.3 Overtraining Problem.....	111
6.2.4 ANN Model for Stress-Strain Relationship of Tire Chip-Sand Mixtures.....	111
6.2.5 Discussion of Neural Network Modeling Results.....	115
6.2.6 Limitation of ANN Model.....	116
Chapter 7: Summary, Conclusion and Recommendations	124
7.1 Background	124
7.2 Summary	125
7.3 Conclusions	126
7.4 Recommendations for Future Study.....	128
Bibliography.....	130
APPENDIX A: Permeability Test Result (Constant Head)	141
APPENDIX B: Compaction Test Result.....	147
B.1 Standard Proctor Test Result	147
B.2 Modified Proctor Test Result.....	152
APPENDIX C: Triaxial Compression Test Results.....	157
APPENDIX D: Source Code for ANN	169
APPENDIX E: Weights and Biases of the Trained Network	172
