

**Dynamic Simulation of Construction Waste in**

**Macao**

by

**Chan Wai Kin**

**Master of Science in Environmental Engineering**

**2008**

**Faculty of Science and Technology**

**University of Macau**

## TABLE OF CONTENTS

LIST OF TABLES .....	ii
LIST OF FIGURES .....	iv
Acknowledgements.....	vii
CHAPTER 1 Introduction .....	1
1.1 The importance of analysis of construction waste in Macao .....	1
CHAPTER 2 Methodology.....	3
2.1 Introduction of STELLA software.....	3
2.1.1 Three layers structures of the interface.....	4
2.2 The origin of system dynamics .....	6
2.3 Principle of System dynamics .....	8
2.4 Application of System dynamics principle in STELLA program.....	9
2.4.1 Mathematics method for solving the dynamic differential equation .....	9
2.5 The simulation process of system dynamic .....	11
2.6 Equation for dynamic simulation of construction waste .....	11
2.7 The Modeling Process .....	12
CHAPTER 3 A brief Survey of the construction industry in Macao.....	18
3.1 Macao Geography location.....	18
3.2 Infrastructure developments for Modernization (Overhead railway, Submarine tunnel) .....	18
3.3 Economic development, Gambling and Tourism industry boom .....	20
CHAPTER 4 Dynamic Simulation of Construction Waste Generation.....	21
4.1 System Dynamics Modeling of Macao population.....	21
4.1.1 Data collection and analysis .....	21
4.1.2 The simulation of Macao population .....	27
4.2 CW generated by construction of casinos and hotels (CWCH).....	30
4.2.1 Analysis for the simulation of CWCH.....	30
4.2.2 The simulation of Macao CWCH .....	37
4.3.1 Analysis for Modeling of CWIR.....	48
4.3.2 The simulation of CWIR .....	50
4.4 CW generated by Civil infrastructures and private construction project in Macao (CWCP) .....	52
4.4.1 Analysis for modeling of CWCP .....	52
4.4.2 The simulation of Macao CWCP.....	59
4.5 CW generated by reconstruction of old zones in Macao (CWRO).....	62
4.5.1 Analysis for modeling of CWRO .....	62
4.5.2 The simulation of CWRO .....	67
4.6 Total CW in Macao.....	69
4.6.1 Results and Discussions.....	70
4.6.2 Sensitivity Analysis .....	71
CHAPTER 5 Conclusion.....	80
BIBLIOGRAPHY .....	83
