

UNIVERSITY OF MACAU

FACULTY OF SOCIAL SCIENCES AND HUMANITIES

DEPARTMENT OF SOCIAL SCIENCES

ECONOMICS PROGRAMME

Habit Formation in China

by

CHAN, Fong Ieong (M-A4-6801-1)

Supervisor: Dr. Patrick Toche

A thesis submitted in partial fulfillment of the requirements for the
degree of Master of Social Sciences at the University of Macau.

June 2008

TABLE OF CONTENTS

Abstract		II
Declaration		III
Acknowledgments		IV
1. Chapter One--Introduction		1
1.1	Motivation	. 1
1.2	Research Purpose	10
1.3	Literature Review	11
1.3.1	Keynesian absolute income hypothesis	11
1.3.2	Problem of Keynes's Hypothesis (Finding of Simon Kuznets)	13
1.3.3	Modigliani Life-Cycle hypothesis	13
1.3.4	Friedman's Permanent Income hypothesis	14
1.3.5	Robert Hall Random Walk hypothesis	16
1.3.6	Problem of Rational Expectation Consumption Theory	18
1.4	Research Method	19
1.4.1	Econometrical Methodology	19
1.4.2	Separation of Rural and Urban Data	20
1.4.3	Using of Panel Data	23
2. Chapter Two—Excess Sensitivity		24
2.1	Excess Sensitivity Phenomenon in Habit Model	24
2.2	Other Causes of Excess Sensitivity	25
2.2.1	Liquidity Constraint	25
2.2.2	Econometric Problem	26
2.2.2.1	Heteroscedasticity	26
2.2.2.2	Serial Correlation	27
2.2.2.3	Non-Stationary Time Series Data	27
2.2.3	Uncertainty	28
3. Chapter Three--Habit Model		30
3.1	Equation for Testing Excess Sensitivity	31
3.2	Equation for Testing Strength of Habit	32

4. Chapter Four--Empirical Testing and Estimation Results	33
4.1	Testing of Other factors that causes Excess Sensitivity 33
4.1.1	Liquidity Constraint 33
4.1.2	Non-Stationary Time-Series Data 38
4.1.3	Uncertainty 41
4.2	Solving of Econometrical Issues 41
4.2.1	Unit Root Tests 41
4.2.2	Heteroscedasticity 46
4.2.2.1	Cross Sectional Weight (GLS) 46
4.2.2.2	Robust covariances (PCSE panel corrected standard error) 46
4.2.2.3	Fix Effect of panel data 47
4.2.2.3.1	"i" cross section > "t" time period 47
4.2.2.3.2	Error term ε_{it} may be correlated with regressor 47
4.2.3	Serial correlation 48
4.2.4	Correlation between Explanatory var and the error term $cov(x, \varepsilon) \neq 0$ 48
4.3	Estimation 50
4.3.1	Testing of Excess Sensitivity 50
4.3.1.1	Comparison of 2 & 3 dummy var tests 51
4.3.2	Control Variables for Excess Sensitivity 51
4.3.3	Empirical Results 53
4.3.3.1	Existing of Excess Sensitivity 53
4.3.3.1.1	Effect of Control Variables 54
4.3.3.1.1.2	Western Provinces excess sensitivity coefficient tests 60
4.3.3.1.2	Summary of Excess Sensitivity Test 62
4.3.3.2	Strength of Habit 62
4.3.3.2.1	Habit Strength Testing Results 68
4.3.3.2.1.1	Western Provinces strength of habits coefficient tests 68
4.3.3.2.1.2	Adding uncertainty as control var tests 69
4.3.3.2.2	Summary of Testing 69
4.4	Possible suggestions of Testing Results 83
4.4.1	Possible reasons for Existing of Habits 83

4.4.1.1	Cultural Factors-Confucianism	83
4.4.1.2	Relative Consumption-Status Reputation	83
4.4.2	Possible reasons For Existing of Uncertainty	83
4.4.2.1	Undeveloped Insurance Markets	84
4.4.2.2	Economic Reform-Unemployment	84
4.4.2.3	Government Social Policy (Rural)	85
5. Chapter Five—Conclusion		87
	Appendix 1 (Sample of 1 Province)	89
	Appendix 2 (Urban & Rural APC and MPC data)	90
	Appendix 1-A Data Description of Appendix 1	92
	Appendix 2-A Data Description of Appendix 2	92
	Appendix 3 Consumption Model with habits	93
	Appendix 4 Coefficient comparison of 2 and 3 dummy variables regression	102
	References	103
