

High-Order Finite Difference Methods for Solving  
Convection Diffusion Equations

by

CHIANG Weng Cheng, Venus

Master of Science in Mathematics

2008

Faculty of Science and Technology  
University of Macau

# Contents

## Chapter 1 Preliminary

|     |                                |   |
|-----|--------------------------------|---|
| 1.1 | Introduction .....             | 1 |
| 1.2 | Richardson Extrapolation ..... | 3 |
| 1.3 | Hermitian Interpolation .....  | 5 |
| 1.4 | Gauss-Seidel Method .....      | 8 |

## Chapter 2 High Order CCD Scheme

|     |   |    |
|-----|---|----|
| 2.1 | CCD Discretization Scheme by Hermitian Polynomial ..... | 9  |
| 2.2 | Sixth-Order CCD Scheme for Solving the 1D CDEs .....    | 13 |
| 2.3 | Sixth-Order CCD Scheme for Solving the 2D CDEs .....    | 20 |
| 2.4 | Eighth-Order CCD Scheme for Solving the 1D CDEs .....   | 22 |

## Chapter 3 Sixth-Order REC Scheme

|     |   |    |
|-----|---|----|
| 3.1 | Sixth-Order REC Scheme for the 1D Case .....          | 25 |
| 3.2 | Sixth-Order REC Scheme for the 2D Case .....          | 29 |
| 3.3 | Sixth-Order Complete REC Scheme for the 2D Case ..... | 36 |

## Chapter 4 Eighth-Order REC Scheme for the 1D Case

|     |   |    |
|-----|---|----|
| 4.1 | Introduction to the Eighth-Order REC Scheme ..... | 41 |
| 4.2 | Solution of the Eighth-Order REC Scheme .....     | 46 |

# Chapter 5 Numerical Results

|     |                            |    |
|-----|----------------------------|----|
| 5.1 | One-Dimensional Case ..... | 51 |
| 5.2 | Two-Dimensional Case ..... | 55 |
| 5.3 | Concluding Remarks .....   | 57 |
