

**Design and Control of an Electromechanical
Variable Rotary Valve System for Four-stroke
Engines**

by

Mok Keng Wa

MSc in Electromechanical Engineering

2008

**Faculty of Science and Technology
University of Macau**

TABLE OF CONTENTS

LIST OF FIGURES	iii
LIST OF TABLES.....	v
LIST OF ABBREVIATIONS.....	vi
ACKNOWLEDGMENT	ix
CHAPTER 1 Introduction	1
1.1 Traditional four-stroke engine valve train.....	1
1.2 Valve timing/lift and flow area.....	1
1.3 Variable valve timing & lift technique and limitations	3
1.4 Rotary valve systems	3
1.4.1 Vertical rotary valve systems.....	4
1.4.2 Horizontal rotary valve systems	9
1.5 Limitations of current rotary valve systems	13
1.6 Project objectives.....	14
CHAPTER 2 System design.....	15
2.1 Schematic design of the system.....	15
2.2 Operation of RVS in four-stroke cycle.....	18
CHAPTER 3 Dynamic model and dynamic analysis	20
3.1 Dynamic model of rotor.....	20
3.2 Simulation.....	27
3.2.1 Simulation model.....	27
3.2.2 Genetic Algorithms based optimization design of PID controller.....	28
3.2.3 Ziegler-Nichols based optimization design of PID controller.....	32
3.2.4 Discussion of simulation results	34
CHAPTER 4 Experimental setup and results.....	35
4.1 Prototype model and experimental setup	35
4.2 Experimental results	40
CHAPTER 5 Conclusions and recommendations	41
5.1 Conclusions	41

5.2 Originality and contribution of reasearch	42
5.3 Recommedations for future work	43
REFERENCES	44
