

Abstract

The purpose of this research is to study the current directions of the work values of senior high school students in Macau and to confer relevant affected values. The affected values of this research include sex, parents education level, school subjects, school results and future developing directions.

The methodology of this research is questionnaire, the subject of this research is senior high school students in Macau, 981 students had completed this questionnaire. Researcher examined the questionnaire according to the data, after using Descriptive, Mean, Standard deviation, Statistics, independent sample t-test, chi-square & one-way ANOVA methodologies to describe, compile statistics, analysis and discuss, have finalized the following conclusion and suggestion.

1. Most senior high school students in Macau have taken account of work values. Most feedbacks are positive, within 6 different level of values, most students place relationship value as the most important value, the rest are 'living value', 'organize value', 'growing value', 'respecting value', 'safety value' and 'living value'.
2. The better school results of senior high school students in Macau the more they will choose to continue university study after graduation. Reversely, less performing students are more likely to continue with their study after graduation.
3. The result differences between male and female students on work values of senior high school students in Macau are female students,

they show higher work values than male students.

4. Parents' education background have not shown any diversity on senior high school students in Macau work values and other values.
5. Senior high school students in Macau who have taken different school subjects have shown diversity on their work values, growth value, respect value, safety value and organize value.

Lastly, researcher has concluded on this result and has given some suggestions to education institute, teachers, parents and society, this is a reference for relevant unit and continuous research.

Key terms: Senior high school students in Macau, work values
