

**Semi-active control algorithm and simulation analysis
for structural protection using MR dampers**

by
Zhang He

Master of Science in Civil Engineering

July 2009

**Faculty of Science and Technology
University of Macau**

Table of Contents

List of Tables	iii
List of Figures	iv
1 Introduction	1
1.1 Background	2
1.2 Objective and Scope	6
2 Literature Review	8
2.1 Passive Control Systems	9
2.2 Active Control Systems	13
2.2.1 Active Mass Dampers	14
2.2.2 Hybrid Control Devices	14
2.3 Semi-active Control Systems	18
2.3.1 Variable Orifice Dampers	18
2.3.2 Variable Friction Dampers	20
2.3.3 Controllable Tuned Liquid Dampers	21
2.3.4 Controllable Fluid Dampers	22
3 Implementing Kalman Filter Approach for Structural Control	25
3.1 An Introduction to the Kalman Filter	26

3.1.1	The Computational Origins of the Filter	26
3.1.2	The Probabilistic Origins of the Filter	30
3.2	Applying Kalman Filter to Estimate the Full-state of the Structure	31
4	Semi-active Control Algorithm for MR Dampers	34
4.1	Phenomenological Model for MR Dampers	35
4.2	Semi-active Control Algorithm	38
4.2.1	Formulation	38
4.2.2	Control law design	39
5	Simulation Analysis	42
5.1	Problem Description	42
5.2	Semi-active control performance	43
5.2.1	Random excitation results	44
5.2.2	Historical recorded earthquake ground motions	45
6	Conclusions and Future Works	80
6.1	Conclusions	80
6.2	Future Works	81
	Bibliography	82
