AMBIENT EFFECTS ON STRUCTURAL HEALTH MONITORING OF BUILDINGS

BY

SIN-CHI KUOK

Master of Science in Civil Engineering

July 2009

Faculty of Science and Technology
University of Macau

TABLE OF CONTENTS

Acknowledgements	iv
Abstract.....	v
TABLE OF CONTENTS.....	vii
LIST OF FIGURES	x
LIST OF TABLES.....	xii
CHAPTER 1 Introduction	1
1.1 Bayesian Frequency Domain Approach.....	3
1.2 Building Immersed in Violent Aerodynamic Excitation.....	5
1.3 Discrimination of Ambient Inferences from SHM	7
1.4 Overview of this Thesis	11
CHAPTER 2 Bayesian Spectral Density Approach.....	12
2.1 Modal Identification using Bayesian Spectral Density Approach	12
2.1.1 Modal Analysis of Incomplete Output-Only Systems	12
2.1.2 Spectral Density Estimator	14
2.1.3 Spectral Density Estimator Probability Density Function (PDF) of the Average Spectral Density Estimator.....	16
2.1.4 Bayesian Spectral Density Identification.....	17
2.2 Illustrative Example.....	20
2.2.1 Example 1: 10-story Shear Building Model	20
2.2.2 Example 2: Case Study of a Two-storey Frame Excited by the Based Shake Table	26
2.2.2.1 Preliminary Analysis.....	27
2.2.2.2 Bayesian Spectral Density Approach.....	31
2.3 Conclusion	32

CHAPTER 3 Health Monitoring of EAH under Severe Typhoons.....	34
3.1 Instrumentation and Description of East Asia Hall.....	34
3.2 Typhoon Description.....	38
3.2.1 Meteorological Information Monitoring.....	38
3.2.2 Description of the Typhoon Events.....	38
3.2.2.1 Typhoon Nuri.....	38
3.2.2.2 Typhoon Hagupit.....	39
3.3 Results.....	40
3.3.1 Response Time History and Averaged Spectral Density Estimator.....	40
3.3.2 Characteristics of Wind Loading.....	43
3.3.3 Wind Excitation Effects on EAH.....	43
3.3.4 Modal Parameters Identification.....	47
3.4 Conclusion.....	53
CHAPTER 4 Discriminate Ambient Interferences from Structural Health Monitoring.....	55
4.1 Bayesian Model Class Selection of Structural Parameters in Terms of Ambient Conditions.....	56
4.1.1 Bayesian Model Class Selection.....	56
4.1.2 Bayesian Model Updating.....	59
4.2 Comparison with Timoshenko Building-as-Beam Model.....	60
4.2.1 Governing and Frequency Characteristic Equation of Timoshenko Beam Model.....	61
4.2.2 Thermo Inferences on Natural Frequency.....	63
4.2.3 Relative Humidity Inferences on Natural Frequency.....	65
4.3 Results.....	66
4.3.1 Preliminary Analysis.....	66
4.3.2 Model Selection Analysis.....	71
4.4 Conclusion.....	82
Chapter 5 Conclusion and Future Work.....	84
5.1 Conclusion.....	84
5.2 Recommendation and Future Work.....	85

Appendix.....	87
Appendix A. Gallery of EAH.....	87
Appendix B. Some major consideration factors of high sensitive accelerometers	88
Appendix C. Formulating $\hat{\mathbf{a}}_j$ and $\Sigma_{\hat{\mathbf{a}}_j}$ of a polynomial regression mode.....	89
Appendix D. Ambient influences on damping ratio for a Rayleigh damping model.....	91
Bibliography	93
