

**In-Vitro Mechanistic Studies on the Intestinal
Absorption and First-Pass Metabolism of
Scutellarein and Scutellarin**

by

Wang, Ya Zhi

Master of Science

2009

Institute of Chinese Medical Sciences

University of Macau

碩士學位論文

燈蓋乙素及其苷元的腸吸收和首過代謝機
理的體外研究

研究生姓名： 王亞之
導 師： 鄭穎博士
專 業： 中藥學
日 期： 2009. 8

TABEL OF CONTENTS

Abstract	I
中文摘要	III
List of figures	VIII
List of tabels	XI
List of abbreviations	XII
Acknowledgments	XIII
CHAPTER 1 INTRODUCTION	1
1.1 Rationale of the study	1
1.2 Chemical structure of flavonoids	3
1.2.1 Absorption of flavonoid.....	4
1.2.2 Metabolism of flavonoid.....	5
1.3 Review of Scutellarin	6
1.3.1 Pharmacokinetics studies.....	7
1.3.1.1 Bioavailability and absorption of scutellarin	7
1.3.1.2 Hydrolization of scutellarin.....	8
1.3.1.3 Absorption of scutellarin.....	8
1.3.1.4 Metabolism of scutellarin.....	8
1.4 Caco-2 cell monolayer model	10
1.5 Glucuronidation	11
1.5.1 Uridine diphosphate glucuronosy transferases	12
1.5.2 Isoenzymes of UGTs.....	13
1.5.3 The selectivity of glucuronosyl conjugation of the flavonoids.....	14
1.6 Aims and Scope of the Study	18
CHAPER 2 MATERIALS & METHODS	19
2.1 Materials	19
2.1.1 Chemicals.....	19
2.1.2 Materials for cell culture.....	19
2.1.3 Instrument	20
2.2 Methods	21
2.2.1 Analytical method.....	21
2.2.1.1 Analytical methods for validation of Caco-2 model	21
2.2.1.1.1 Fluorescence analysis of lucifer yellow.....	21
2.2.1.1.2 HPLC analysis of propranolol	21
2.2.1.2 HPLC Analysis of samples containing scutellarin and scutellarein	21
2.2.1.2.1 HPLC Analysis of scutellarein and scutellarin.....	21
2.2.1.2.2 Preparation of calibration curves for scutellarein and scutellarin.....	22

2.2.1.2.3	Validation of the HPLC methods	22
2.2.1.2.4	Identification of metabolites with HPLC/MS.....	23
2.2.2	Determination of solubility profiles of scutellarein and scutellarin in phosphate buffer	23
2.2.3	Determination of stability profiles of scutellarein and scutellarein in phosphate buffer	24
2.2.4	Cell culture.....	24
2.2.5	Validation of Caco-2 cell monolayer model.....	24
2.2.5.1	Integrity of Caco-2 cell monolayer at pH 6.0.....	24
2.2.5.2	Permeability of paracellular and transcellular markers at pH 6.0.....	25
2.2.5.3	Cytotoxicity test	25
2.2.6	Transport study of scutellarein and scutellarin using Caco-2 cell monolayer model	26
2.2.6.1	Preparation of scutellarein and scutellarin	26
2.2.6.2	Bi-directional transport experiment	26
2.2.6.3	Further investigation of the transport mechanisms of scutellarein and scutellarin.....	27
2.2.6.4	Uptake experiment	27
2.2.7	Calculation	28
2.2.8	Data analysis	28
2.2.9	In vitro metabolism incubation studies.....	29
2.2.9.1	Glucuronidation activity assay	29
2.2.9.2	In Vitro P450 mediated hydrolyzation assay	29
2.2.9.3	HPLC Analysis of samples containing microsome and drug	30
2.2.9.3.1	HPLC Analysis of scutellarein and scutellarin.....	30
2.2.9.3.2	Preparation of calibration curves for scutellarin with microsomes	30
2.2.9.4	Sample preparation.....	30
2.2.9.5	Quantitative analysis of scutellarein and its metabolites by HPLC/UV	31
2.2.9.6	Qualitative Analysis of LC/MS/MS.....	31
2.2.9.7	Data Analysis	32
CHAPTER 3	RESULTS	33
3.1	HPLC Analysis of scutellarein and scutellarin	33
3.1.1	HPLC Analysis of scutellarein and scutellarin	33
3.1.2	HPLC analysis of samples containing mixtures of scutellarein and scutellarin.....	34
3.2	Solubility of scutellarein and scutellarin in PBS	35
3.3	Stability of scutellarin and scutellarein	35
3.4	Validation of the HPLC methods	36
3.4.1	Calibration curve.....	37
3.4.2	Precision and Accuracy.....	38

3.5 Validation of Caco-2 model Permeability of paracellular and transcellular markers at pH 6.0	39
3.6 Cytotoxicity test	40
3.7 Bi-directional Transport study of scutellarein and scutellarin	41
3.8 Formation of glucuronide of scutellarein during its bidirectional transport	49
3.9 Glucuronidation activity of scutellarein by intestinal and liver microsomes	55
3.9.1 Calibration curve.....	55
3.9.2 Identification of glucuronides of scutellarein	57
3.9.3 Kinetic Profiles of glucuronidation of scutellarein by intestinal and liver microsomes	63
3.9.4 Glucuronidation of scutellarein by Human Recombinant UGT ..	63
3.10 Glucuronidation activity of scutellarin	68
3.11 P450-mediated hydrolization of scutellarein and scutellarin	69
3.11.1 Recovery of scutellarein and scutellarin in the P450-mediated hydrolization	69
3.11.2 Identification of P450-mediated hydrolization of scutellarin	72
CHAPER 4 DISCUSSIONS	75
CHATER 5 CONCLUSIONS	78
Curriculum Vita.....	79
References.....	80
